TECHNICAL INSECTICIDE
FOR MANUAL PURPOSES ONLY

ACTIVE INGREDIENTS

Dimethyl phosphate of alpha
methylbenzyl 3-hydroxy-cis-

INERT INGREDIENTS

BY WEIGHT

80 %

20 %

100 %

TOTAL

* CIODRIN® Insecticide

USDA Registration No. 201-166

Contents _____

DANGER Keep Out of Reach of Children

Poisonous if Swallowed, Inhaled
Or Absorbed through Skin.

DO NOT SWALLOW OR GET IN EYES, ON SKIN, OR ON CLOTHING. Do not breathe vapors or spray mist. Wear clean synthetic rubber gloves, clean protective clothing and goggles or face shield. Change gloves frequently and destroy used gloves. Wear a mask or respirator of type approved and suitable by the U. S. Department of Agriculture for Ciodrin products. Wash thoroughly with soap and water after handling and before eating or drinking. If the chemical gets into the eyes, immediately flush with water for at least ten minutes and get medical attention. In case of accidental contact, remove all contaminated clothing and wash skin with soap and water; wash clothing before reuse. In case of spillage, wash down with large amounts of water. Decontaminate areas and equipment by washing with a concentrated solution of alkali and detergent and rinsing with water. Do not store near food products. To prevent reuse, empty containers should be decontaminated and destroyed.

ANTIDOTE AND FIRST AID TREATMENT

ATROPINE IS THE EMERGENCY ANTIDOTE FOR CIODRIN POISONING.

Consult your physician about obtaining an adequate supply of 1/100 grain Atropine Tablets for emergency use.

CALL A PHYSICIAN IMMEDIATELY IN ALL CASES OF SUSPECTED POISONING.

**TECHNICAL CIODRIN® INSECTICIDE
FOR MANUFACTURING PURPOSES ONLY (CONT'D)**

INTERNAL: If the material has been swallowed, induce vomiting immediately. This may be done by introducing a finger into the throat or by giving warm salt water (1 tablespoon of salt to a glass of water). NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON.

EXTERNAL: If the material has been spilled on the skin, immediately remove patient from the vicinity of the insecticide, remove all contaminated clothing, and wash skin with copious running water. If the material gets into the eyes, wash immediately with running water for at least ten minutes.

IF WARNING SYMPTOMS APPEAR: Administer two 1/100 grain Atropine Tablets immediately.

NEVER ADMINISTER ATROPINE UNTIL WARNING SYMPTOMS APPEAR.

(See WARNING SYMPTOMS below)

Keep patient prone and quiet.

Start artificial respiration immediately if patient is not breathing.

Transport the patient immediately to the nearest physician.

NOTE TO PHYSICIAN

WARNING SYMPTOMS: Symptoms include weakness, headache, tightness in chest, blurred vision, non-reactive or inequally sized pupils, salivation, sweating, nausea, vomiting, diarrhea and abdominal cramps.

TREATMENT: Atropine is the specific therapeutic antagonist of choice against parasympathetic nervous stimulation. If there are signs of parasympathetic stimulation, atropine sulfate should be injected at 10 minute intervals, in doses of 1 to 2 milligrams, until complete atropinization has occurred. Morphine is contraindicated. Relieve chest by postural drainage. Oxygen administration may be necessary. Observe patient continuously for 8 hours. Repeated exposure to cholinesterase inhibitors may, without warnings, cause prolonged susceptibility to very small doses of any cholinesterase inhibitor. Allow no further exposure until time for cholinesterase regeneration has been allowed as determined by a load test.

DECONTAMINATE AND DESTROY UNUSED CONTAINERS

DO NOT RE-USE FOR ANY PURPOSE

Decontaminate containers by washing thoroughly with a strong solution of alkali and detergent and rinse with water.

Destroy containers by crushing and burning; then bury or burn; if burned stay out of smoke.
