USDA Reg. No. _____ Net Contents _____

CAUTION! KEEP OUT OF REACH OF CHILDREN.

GENERAL DIRECTIONS

20% VAPONA® Insecticide Resin Strip (Bulk) is a specially prepared insecticidal formulation for use in the control of resistant and non-resistant insects.

Cut the Bulk 20% VAPONA Insecticide Resin Strip into ten (10) inch portions. Each reel is approximately 16 feet long and will make approximately 19 x 10" portions.

DIRECTIONS FOR USE

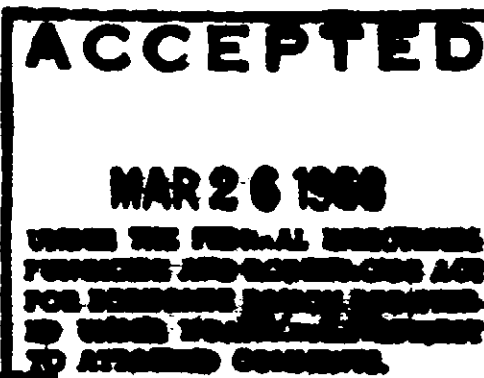

CATCH BASINS: For the control of mosquitoes breeding in catch basins suspend ten (10) linear inches of 20% VAPONA® Insecticide Resin Strip approximately ten (10) inches above the water line in each basin. Each strip should give effective control for ten to fifteen weeks. Replace strip when effectiveness diminishes.

SEWER SYSTEMS: As an aid in the reduction of roaches in sewer lateral systems, suspend ten (10) linear inches of 20% VAPONA® Insecticide Resin Strip within two (2) feet of the bottom of the manhole. One strip should be effective for one to two months. Replace strip when effectiveness diminishes.

PRECAUTIONS IN USING

CAUTION! Keep Out of Reach of Children. Do not get in mouth, harmful if swallowed. After prolonged storage, a small amount of liquid may form on the strip. Do not get liquid in eyes. Wash hands thoroughly with soap and water after handling strip. Do not contaminate feed, water or food stuffs, milk or milking utensils.

Use of the packaged product is licensed under Shell's U. S. Patents 2,956,073 and 3,116,201 for use as an insecticide generator only. Not to be taken internally by humans or animals.
