USE AND DIRECTIONS FOR APPLICATION

HOUSEHOLD USES

GENERAL: For control of flies, gnats, mosquitoes and other small flying insects in houses or other enclosed areas, suspend one NO-PEST Ministrip per 150 cubic feet. Weather and other conditions such as extreme drafts may alter the performance of the NO-PEST Ministrip but this treatment is usually effective for two to three months. Replace when effectiveness diminishes.

CLOTHES CLOSETS AND STORAGE CHESTS: For control of clothes moths, black carpet beetle larvae, and the reduction of silverfish in clothes or storage chests up to 100 cubic feet in capacity, suspend one NO-PEST Ministrip. Do not place unprotected strip in direct contact with fabrics. Weather and other conditions such as high humidity may alter the performance of the NO-PEST Ministrip but this treatment is usually effective for two months. Replace in two months.

GARBAGE CANS: For control of flies, gnats, and roaches, attach one NO-PEST Ministrip inside each average-sized garbage can (24-gallon capacity). Keep lid on garbage can. One unit will be effective for an entire fly season.

METER BOXES: For control of roaches in tight electric and water meter boxes, place one NO-PEST Ministrip on the bottom of each box. One unit should be effective for one to two months. Replace strip when effectiveness diminishes.

CAMP-SITE USES

TENTS, HOUSE TRAILERS, CABINS, ENCLOSED OUTDOOR LAIRINES, AND CAMPING AREAS: For control of flies, gnats, mosquitoes and other small flying insects, suspend one NO-PEST Ministrip per 150 cubic feet of enclosed area. In large tents, cabins, or trailers, more than one unit will normally be required. Weather or

other conditions such as extreme ventilation or strong drafts may alter the performance of the NO-PEST Ministrip but this treatment is usually effective for two months. Replace if effectiveness diminishes.

GARBAGE-CANS IN CAMPING AREAS: See directions under Household Uses.

Use of the packaged product is licensed under Shell's U. S. Patents 2,950,073 and 3,116,201 for use as an insecticide generator only. Not to be taken internally by humans or animals.
