SOLID RED

DO NOT REMOVE STRIP FROM THE ENVELOPE UNTIL READY FOR USE

No-Pest Strip

INSECTICIDE

NO-PEST STRIP is a specially prepared insecticidal formulation for use in the control of flies, gnats, mosquitoes and other small flying insects for up to 4 months.

HOW TO KILL FLYING INSECTS FOR UP TO 4 MONTHS:

Use one strip for each 1,000 (10' x 12' x 8') cubic feet of enclosed area. Stand or hang decorative holder containing strip so that air is free to circulate on all sides for maximum effectiveness. One strip is usually effective for up to 4 months in an average room (10' x 12' x 8').

- Ideal for • Bedroom • Living Room • Garage • Attic
 • Garbage Cans • Kennels • Horse Barns

The NO PEST STRIP is designed to work by continuous action. It kills flying insects without touching them.

If more than one strip is required, place at least 10 feet apart. Weather and excessive ventilation may reduce effectiveness. Replace when effectiveness diminishes.

For garbage cans, attach one strip inside can, keep lid in tight. For animal buildings, such as dog kennels and horse barns, use one strip for every 1,000 cubic feet of enclosed area.

For the control of flies, gnats and mosquitoes in milk rooms and bulk milk storage rooms, suspend one strip per 1,000 cubic feet of enclosed area. Weather and other conditions such as extreme ventilation or strong drafts may alter the performance of the strip. Replace strips if effectiveness diminishes.

HOW TO ASSEMBLE:

1. Remove the GOLD foil holder from this box. It is folded flat. Push at the outer edges to form into shape shown here. Close bottom flaps. Leave top flaps open. The top has

Continuous control up to 4 MONTHS!

Continuous control up to 4 MONTHS!

Ideal for: • Bedroom • Living Room • Garage • Attic
 • Garbage Cans • Kennels • Horse Barns

The NO-PEST STRIP is designed to work by continuous action. It kills flying insects without touching them.

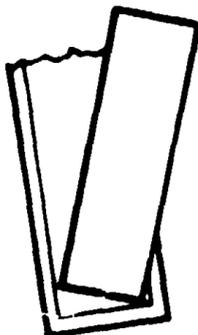

If more than one strip is required, place at least 10 feet apart. Weather and excessive ventilation may reduce effectiveness. Replace when effectiveness diminishes.

For garbage cans, attach one strip inside can, keep lid on tight. For animal buildings, such as dog kennels and horse barns, use one strip for every 1,000 cubic feet of enclosed area.

For the control of flies, gnats and mosquitoes in milk rooms and bulk milk storage rooms, suspend one strip per 1000 cubic feet of enclosed area. Weather and other conditions such as extreme ventilation or strong drafts may alter the performance of the strip. Replace strips if effectiveness diminishes.

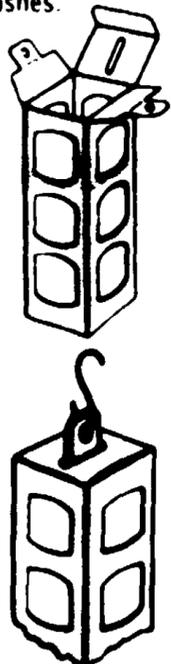

HOW TO ASSEMBLE:

1. Remove the GOLD foil holder from this box. It is folded flat. Push at the outer edges to form into shape shown here. Close bottom flaps. Leave top flaps open (the top has a slot cut in the closing flap).

2. Cut open envelope containing the NO-PEST STRIP and remove strip. Insert strip into holder. NOTE: Do not allow the strip to touch textiles or painted surfaces; it may stain.

3. Close top of holder, inserting two side flaps up through slot in top. To hang up, insert hook through holes in side flaps.

CAUTION! KEEP OUT OF REACH OF CHILDREN

Do not get in mouth; harmful if swallowed. After prolonged storage, a small amount of liquid may form on the strip. Do not get liquid in eyes. Wash hands thoroughly with soap and water after handling strip. Do not place in hospital or clinic rooms, such as patient rooms, wards, nurseries, operating or emergency areas. Do not use in any room where infants, the sick or aged are or will be present for any extended period of contact. Do not use in kitchens, restaurants or areas where food is prepared or served.
