

# Central's RESIDUAL SPRAY

An Oil Solution for Indoor Application  
as a Surface Spray

For use in spot treatments for the control of:

COCKROACHES      ANTS      SPIDERS      CRICKETS  
SILVERFISH      CLOVER MITES      EARWIGS  
SCORPIONS      BOX ELDER BUGS

The residues formed by the sprays are effective against resting house flies, wasps, and mosquitoes.

**ACTIVE INGREDIENTS: 99.879%**

O, O-diethyl O-(2-isopropyl-4-methyl-6-pyrimidinyl) phosphorothioate .....	0.50 %
Aromatic solvent .....	0.406 %
*Piperonyl Butoxide, Technical .....	0.375 %
Pyrethrins .....	0.075 %
Petroleum Oil .....	98.523 %

\*Equivalent to .30% of (butylcarbityl) (δ-propylpiperonyl) ether, and to .075% of related compounds.

**INERT INGREDIENTS: 0.121%**

**DIRECTIONS**

Remove children, pets or fishbowls from the quarters, cover foods and any utensils that may be used for foods. Use only a coarse spray, applying enough to wet the surface without any run-off of the spray. The insects that are hit by the spray are killed and others are killed when they rest on the residual deposits. Spray cracks around baseboards, beneath cabinets, sinks and stoves. Spray areas around door sills, window frames and other areas where these insects may enter. Spray ant trails and mounds. Repeat application when necessary.

**FOOD HANDLING ESTABLISHMENTS**—Places other than private residences in which exposed food is held, processed or prepared. Do not use in serving area while food is exposed.

**FOOD AREAS LIMITED TO CRACK AND CREVICE TREATMENT ONLY.** Prior to application de-energize electrical equipment. After application, allow time for oil to evaporate before starting motors or placing switches in the "ON" position. Includes areas for receiving, serving, storage, packing (canning, bottling, wrapping, boxing) preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups).

Apply full strength in small amounts directly into cracks and crevices using a pin stream of insecticide in points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases, where roaches, waterbugs or silverfish hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

**APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT ARE NOT PERMITTED.**

**NON-FOOD AREAS-SPOT APPLICATION**—Includes garbage rooms, lavatories, floor drains (to sewers) entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling.) Spray or paint to base-board areas, around water pipes, surfaces behind and beneath sinks, lockers, tables, pallets and similar areas where insects hide or through which they may enter.

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

Harmful if swallowed. Avoid breathing of spray mist. Avoid contact with skin; wash thoroughly after using.

"Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies."
