ONE GALLON

URAB® LIQUID CONCENTRATE

BURN AND WEED KILLER

For Control of Woody Plants and Deep-Rooted Weeds in Non-Crop Land

CODE 9946 U.S. PATENT NO. 2,782,002 and 2,801,911

CAUTION—Keep out of reach of children

For Additional CAUTION Information See Other Panel
USDA Reg. No. 218-446

DO NOT USE OR STORE NEAR HEAT OR OPEN FLAME

*Fenuron
Trichloroacetate*

ACTIVE INGREDIENT: Fenuron, 1-(1-methyl-2-pyrrolidyl)urea trichloroacetate, 32.44%
INERT INGREDIENTS: 67.56%

Contains 3 pounds of Urab per Gallon

Serving Agriculture from Coast to Coast
NITROGEN DIVISION
40 NECTOR STREET, NEW YORK, N. Y., U. S. A.

distributed spots over the root area or in a circle halfway between the trunk or clump center and the drip area. The URAB LIQUID may be diluted at the rate of one quart in 2 1/2 gallons of water or any of the above oils and applied to the base and root area of the plant.

CATTAILS: Use 4 to 5 gallons per acre diluted in enough of any of the above oils or water to give good coverage. Best results will be obtained by making application when the foliage of the cattails is mature.

NOTE: Do Not apply, allow to drift, or drain or flush equipment onto or near, croplands, lawns, trees or other desirable plants or to areas where their roots may extend. Do Not contaminate domestic or irrigation water supplies. Do Not allow contact with fertilizers, insecticides, fungicides or seeds. Application equipment should be thoroughly cleaned with a detergent and water to prevent corrosion. Equipment which has been used to apply this product should not be used for applying insecticides, fungicides, fertilizers or other agricultural chemicals as plant injury may result.

CAUTION!

HARMFUL IF SWALLOWED
IRRITATING TO SKIN AND EYES

Do not get on skin, in eyes or on clothing. In case of contact, immediately wash skin with plenty of water; for eyes, wash with water for at least 15 minutes and get medical attention.

Seller makes no warranty of any kind, express or implied, concerning the results obtained by the use of this material. Buyer assumes all risk of use or handling and there is no liability in accordance with any suggestions, recommendations or directions of seller.

DIRECTIONS

The following general directions are supplied by us gratuitously but are in no way guaranteed.

The toxic ingredient in URAB LIQUID is relatively soluble in water. URAB's effectiveness in root killing is due to this solubility characteristic. Once URAB is spread on the soil, rain water dissolves it and carries it down into the deep root zone, killing roots as it goes and thus preventing regrowth. Because of the root killing ability of URAB, it is a highly effective control material for hard to kill weeds and brush.

URAB works best when adequate rainfall is available. In unusually dry periods, or periods of light rainfall, URAB will not be carried to the root zone and the usual full killing power will not be realized until there is enough rain to carry it to the roots. However, URAB will remain in the soil through long periods of dry weather, ready to act whenever there is enough rain to make it effective.

For Control of Hard To Kill Woody Plants and Weeds Such As Oak, Hickory, Sassafras, Sumac, Wild Cotton, Trumpet Vine, Briars, Cornelia, Tobacco, and Most Other Annual and Perennial Weeds on noncrop land such as Field of Ways, Industrial Plants, Lumber Yards, Tank Farms, Storage Areas and Parking Lots.

BROADCAST APPLICATION (Brush and Weeds): Use 6 to 9 gallons per acre diluted in enough water or oil to give good coverage. Application of 10 to 100 gallons will be needed to give good coverage of vegetation. For small areas use 1 to 2 quarts to 1 to 2 gallons per 100 sq. ft. diluted in 1 to 2 quarts of water or any of the above oils.

SPOT OR BASAL APPLICATION (Woody Plants): Use 1 to 2 quarts of undiluted URAB LIQUID per inch of diameter at base of trunk.
