# DIRECTIONS

#### NON-CROP AREAS

For use on Non-crop land such as <u>Right-of-Ways</u>, Industrial Plants, Lumber Yards,

Task Farms, Storage Areas, and Parking Lots for control of most annual and perennial grasses and broadleaved weeds. The effectiveness and length of time that control will last will depend on type of soil, amount of rain and other conditions.

RATE: Under ordinary conditions use at the rate of 2 to 4 gallons per 1000 square feet (1% to 3% pints per 100 square feet). Under conditions where the weeds are difficult to control, use at the rate of 6 gallons per 1000 square feet. (4% pints per 100 square feet).

HOW TO APPLY: Use a sprayer which will distribute the required amount evenly over the area to be treated. Use a coarse spray to reduce drift. Application may be made when top growth is dense, but better control will be obtained when weeds are short or when excess growth is mowed and removed before applying.

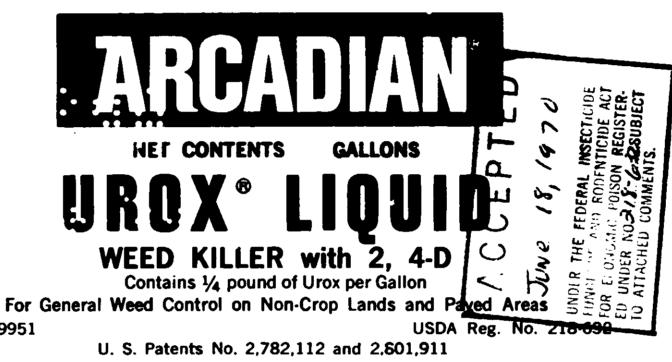

WHEN TO APPLY: Best results will be obtained if applied shortly before or at the time plant growth begins. Rain or thorough watering after application will cause the material to move to the root zone and thus speed up control.

# CAUTION!

HARMFUL IF SWALLOWED **IRRITATING TO SKIN AND EYES** 

Do not get on skin, in eyes or on clothing.

In case of contact, immediately wash skin with plenty of water: for eyes, wash with water for at least 15 minutes and get medical attention.
