ANT & TICK  
CONTROL

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH CAUTIONS, WARNINGS AND DIRECTIONS, AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS. KEEP PESTICIDE IN ORIGINAL CONTAINER

DIRECTIONS

**ANTS (IMPORTED FIRE ANTS AND OTHERS): Non-Crop Areas—Lawns, Cemeteries, Golf Courses, Park Areas, Nurseries, Area Treatment—**Apply 25 lbs. per acre or 8 ozs. per 1,000 sq. ft. Apply by fertilizer distributor, spreader or broadcast by hand. Always wear protective gloves when broadcasting by hand. Apply from late fall to early spring. Do not apply to areas planted to food crops. **Mound Treatment For Imported Fire Ants—**Where infestations are light or for temporary control—Tear down mound with a rake or hoe and apply 2 to 4 cupfuls to the mound and to the ground within a 10 foot area on all sides. Do not apply to areas planted to food crops. Birds feeding over treated area may be harmed.

**TICKS, CHIGGERS: Non-Crop Areas—Lawns and Recreational Areas—**Apply 20 lbs. per acre or 5 ozs. per 1,000 sq. ft. Treat only infested areas. One application is usually sufficient for a season. Apply with regular granular applicator or cyclone seeder.

**SOIL INSECTS (White-Fringed Beetle Larvae, Japanese Beetle Larvae, Mole Crickets, White Grubs, Wireworms)—Non-Crop Areas, Lawns and Recreational Areas Only—**Apply 1 1/2 lbs. per 1,000 sq. ft. on infested sites. Apply to soil surface before planting and work into upper few inches of soil, or on lawns, wash into soil with water. Do not apply to areas planted to food crops.

DO NOT INHALE
