CHLORDANE 20 GRANULAR

Active Ingredient:

*Technical Chlordane 20%
Inert Ingredients: 80%
100%

*Equivalent to 12% Octachloro-4, 7-methanotetrahydronane and 8% Related Compounds

CAUTION:

- **KEEP OUT OF REACH OF CHILDREN.**
- **HARMFUL IF SWALLOWED.**
- **AVOID BREATHING DUST.**
- **AVOID CONTACT WITH SKIN.**
- **WASH WITH SOAP AND WATER AFTER EXPOSURE.**
- **AVOID CONTAMINATION OF FEED AND FOODSTUFFS.**

See Additional Precautions on Back

CAUTION:

This product is toxic to man, birds, and other mammals, and other wildlife in treated areas may be affected. Do not apply within 100 feet of lakes, streams, or ponds. Do not apply when rain is likely to occur. Do not contaminate water by spraying equipment or disposal of wastes. Apply this product only as specified on the label.

ANTIDOTE:

EXTERNAL: In case of spillage on skin, wash promptly with soap and water.

INTERNAL: Emetic of One (1) Tbspn. of mineral oil or Tumbler of water. Call a Physician.

CONTAINER DISPOSAL:

Do not reuse empty containers. Empty equipment, containers and dispose of wastes by burying in a deep hole away from water supplies. Containers should be disposed of by puncturing holes in them and burying in a shallow hole by burning. Keep out of smoke.

DIRECTIONS FOR USE

CORN SOIL INSECTS: For control of corn borers, apply a uniform broadcast treatment at the rate of 12½ lbs. per acre after the field is plowed. Do not spray the crop until effective August 1, 1970.

INSECT CONTROL ON NURSERY STOCK For Use Under U.S.D.A. Japanese Beetle Quarantine Programs Only. For the control of Japanese Beetle Grubs on Nurseries where environmental factors are such that the use of Chlordane 20 Granular granules at 3 lbs. per acre is sufficient to cover surface uniformly, use granular application. Treatment should be applied in the spring or winter when no damage is observed to be troublesome. Do not treat soil which is wet. Apply before rain or sprinkling.

ANTIDOTE

EXTERNAL. In case of spillage on skin, wash promptly with soap and water.

INTERNAL Effects of One- β following External One- β Termination of water. Gell + Phys. 1960.

CONTAMINATED DISPOSAL

**Do not reuse empty containers. Please deposit them in
tumens and dispose of wastes by burying in a dry, and
away from water supplies. Containers should be dug out
of by punching holes in the bottom and burying in the soil or
by burning. Keep out of reach.**

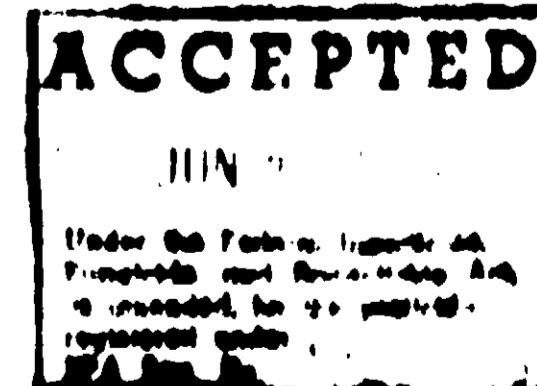

DIRECTIONS FOR USE

CORN SOIL IN EIGHT TREATMENTS—
After the first treatment, the soil was
a broadleaf treatment, the second, a grass
treatment, the third, a grass treatment,
after the field in which it was sown, the fourth
effective August 1911.

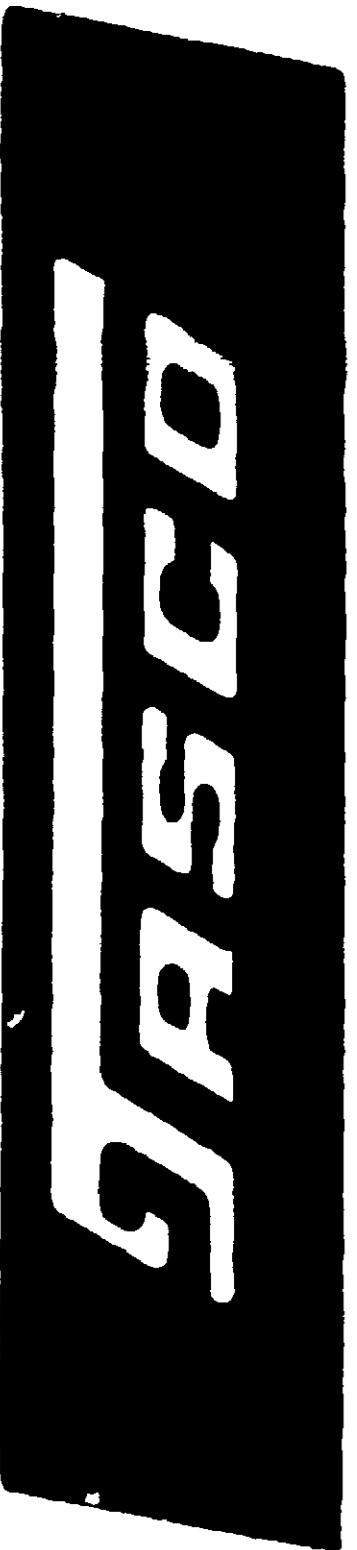

**INSECTICIDE NAME: Dieldrin. For Use Under
U.S.D.A. Japanese Beetle Quarantine Programme Only.** For
the control of Japanese Beetles feeding on New York State
ornamental plants, the grower may use the following: One-half
Oz. Dieldrin 20 Granular per acre, or 10 lbs. per acre, to be applied
to cover surface uniformly, and a further application of the treatment
should be applied in the spring, as required. The insecticide
should be applied in the early morning, when the beetles are
observed to be feeding. Do not treat the plants when wet.
Apply before June 1st of each year.
