**USAGE WARNINGS**

**WARNING:** Keep out of reach of children.

May be fatal if swallowed. This solution if brought into contact with skin can cause toxic symptoms. Wash with soap and water. Avoid inhalation and skin contact. Avoid contamination of feed and foodstuffs. Keep out of reach of children. Do not use on humans or household pets.

**DO NOT USE, FILL, OR STORE NEAR OPEN FLAME.**

This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Keep out of lakes, ponds and streams. Do not apply to any area not specified on the label.

Rinse equipment and containers and dispose of wastes by burning in non-crop lands away from water supplies. Container should be disposed of by puncturing holes in them and burning with wastes or by burning (keep out of smoke). Do not contaminate water by cleaning of equipment, or disposal of waste.

**USE AND APPLICATION DIRECTIONS**

**TERMITIC CONTROL:** To control termites, apply the required amount of TASCO BRAND 8 lb. Chlordane Emulsion with sufficient water to provide a mixture containing 1.0% by weight Chlordane (see part of this emulsion with 8 parts water or approximately 1 pt. per 13 gal. of water) and apply at the following rates:

(A) **BUILDING WITH CONCRETE SLABS ON THE GROUND:**

1. Apply 1 gallon per 15 ft. of slab as an over-spray under the slab as well as under attached portions, eaves, cornices, ledges, exterior windows and similar situations where slab or fill is to all grade level. In case of wood skids, cylinders or other similar material, increase the dosage of at least one-half. In case of treated wood, use the dosage and the non-treated wood to cut wood which may be in contact with the treated wood. Do not apply to any wood or treated material which may be in direct contact with the treated wood.

2. Apply 2 gal. per 500 ft. of slab as an over-spray to the slab around the perimeter of the slab under the slab as well as under attached portions, eaves, cornices, ledges, exterior windows and similar situations where slab or fill is to all grade levels. Do not apply to any wood or treated material which may be in direct contact with the treated wood. In case of wood skids, cylinders or other similar material, increase the dosage of at least one-half. In case of treated wood, use the dosage and the non-treated wood to cut wood which may be in contact with the treated wood.

(B) **BUILDING WITH BASEMENTS:**

1. Apply 1 gallon per 10 ft. as an over-spray under the basement floor as well as under attached portions, eaves, cornices, ledges, exterior windows and similar situations where slab or fill is to all grade levels. In case of wood skids, cylinders or other similar material, increase the dosage of at least one-half. In case of treated wood, use the dosage and the non-treated wood to cut wood which may be in contact with the treated wood.

2. Apply 2 gal. per 500 ft. of slab as an over-spray to the slab around the perimeter of the slab under the slab as well as under attached portions, eaves, cornices, ledges, exterior windows and similar situations where slab or fill is to all grade levels. Do not apply to any wood or treated material which may be in direct contact with the treated wood. In case of wood skids, cylinders or other similar material, increase the dosage of at least one-half. In case of treated wood, use the dosage and the non-treated wood to cut wood which may be in contact with the treated wood.

(C) **BUILDING WITH CRAWL SPACES:**

1. Apply 1 gallon per 15 ft. to critical areas only under the slab, such as along the inside of foundation walls, around sewer pipes, conduits, etc. Where slabs are not present, treat as described in part (A) above.

2. Apply 2 gal. per 500 ft. of slab as an over-spray to the slab around the perimeter of the slab under the slab as well as under attached portions, eaves, cornices, ledges, exterior windows and similar situations where slab or fill is to all grade levels. Do not apply to any wood or treated material which may be in direct contact with the treated wood. In case of wood skids, cylinders or other similar material, increase the dosage of at least one-half. In case of treated wood, use the dosage and the non-treated wood to cut wood which may be in contact with the treated wood.

**ACTIVE INGREDIENTS:**

- Technical Chlordane: 34.6% (2 oz. per gallon)
- Petroleum distillates: 16.4%

**WARNING:** Keep out of reach of children. See other warnings on back panel.
