CONTAINS DURSBAN® 1/2% G GRANULAR INSECTICIDE

CONTROLS CHINCH BUGS, SOD WEBWORMS (Lawn Moths), ANTS, BROWN DOG TICKS, CRICKETS, CUTWORMS, EARWIGS, SOWBUGS (Pillbugs), CERTAIN WHITE GRUBS, and HYPERODES (Turfgrass) WEEVILS
Infesting Home Lawns and Other Ornamental Turf Areas.

USE DIRECTIONS

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Apply Lawn Saver insecticide uniformly to home lawns and other ornamental and recreational turf grass areas using any hand or power operated gravity or rotary type spreader designed for application of granular materials. Treat when insects first appear using DURSBAN Lawn Saver at the rate of 200 pounds per acre. To help obtain uniform distribution apply one-half the required amount of product in one direction, then apply the balance at a right angle. Immediately after application sprinkle the turf with 1300 gallons of water per acre so as to wash the granules into the zone of insect infestation. Consult the following table to determine amounts of DURSBAN Lawn Saver and water needed for smaller sized areas. Repeat as necessary.

RATES TO USE

Area to be Treated	Pounds of LAWN SAVER	Gallons of Water to Sprinkle on Turf after Treatment
1,000 sq. ft.	5	30
5,000 sq. ft.	25	150
10,000 sq. ft.	50	300

For best results, water the lawn thoroughly after application. Watering should be continued until the granules are well washed into the soil. Watering should be continued until the granules are well washed into the soil. Watering should be continued until the granules are well washed into the soil.
