

# 10% DACTHAL<sup>®</sup> GRANULES

~~FOR EXPERIMENTAL USE~~

**CAUTION: KEEP OUT OF REACH OF CHILDREN.**

See Additional Precautions Below.

ACTIVE INGREDIENTS:	% by Wt.
Dimethyl ester of tetrachloroterephthalic acid*	10%
INERT INGREDIENTS:	90%
Total	100%

\*Use as pre-emergence herbicide patented under U.S. Patent No. 2,923,634<sup>®</sup> A Diamond Alkali Product

This treatment and application will control annual grassy and some broadleaved weed species, such as smooth and hairy crabgrass, green foxtail, yellow foxtail, lovegrass, witchgrass, carpetweed, common chickweed, lambsquarters and purslane.

PRECAUTIONS — Do not store near feed and foodstuffs, seed, fertilizers, or other pesticides in order to prevent contamination. Do not graze on treated areas or feed plant refuse, vines, or threshings to livestock.

**CAUTION**

Do not take internally. Harmful if swallowed. Avoid contact with eyes.

Wash after handling or using.

Do not reuse container. Destroy

NOTICE — Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.

### DIRECTIONS

**SOYBEANS** — Apply 20 pounds per acre in a 10 inch band on 38-40 inch rows. Prior to making application the soil should be cultivated to provide a weed-free and uniform surface since this product is effective ONLY when applied before weed seed germination. Shallow incorporation (1-2 inches) often gives more consistent results. Unless incorporated, apply granules within 2-3 days maximum following cultivation, to prevent subsurface weeds from becoming established before product is activated. The soil should not be disturbed following application, and if cultivation is made between rows care should be taken to see that the treated band is not covered. Make application just prior to or at time of planting.
