

DIRECTIONS

Enclosed Measuring Spoon Holds $\frac{3}{4}$ oz. (heaping).

FOR PROTECTION OF GERMINATING SEEDS AND SEEDLINGS AGAINST SEED CORN BEETLES ON CORN

As a planter box treatment use 4-5 ounces per bushel of seed corn. Use only on seed that has been previously treated with a fungicide. Best results are obtained by mixing in a separate container prior to putting seed corn in planter-box. Do not mix with bare hands.

FOR PROTECTION OF GERMINATING SEEDS AND SEEDLINGS AGAINST SEED CORN MAGGOTS ON CORN, PEAS, SOYBEANS AND BEANS (Snap, Lima, White and Kidney)

As a planter box treatment use $1\frac{1}{2}$ -3 ounces per bushel of seed. Mix with seed prior to planting. Do not use bare hands.

NOTE: Periodically checking and cleaning plates and boxes during planting is recommended. Buildup of the seed treatment sometimes occurs during high humidity which will affect planting rate. It is also suggested that if poor plantability occurs a plate with larger cells be used to compensate for the seed treatment coating.

WARNING

May be fatal if swallowed. May be absorbed through the skin. Do not breathe dust. Avoid contact with skin, eyes and clothing. Wash thoroughly after handling. Avoid contamination of food and feed. Do not use treated seed for food, feed or oil purpose. This product is toxic to fish and wildlife.

Treated seeds exposed on soil surface may be hazardous to birds and other wildlife. Dispose of treated excess seeds by burial. Apply this product only as specified on this label.

Do not reuse this container. Destroy by burying or burning. Keep out of smoke.
