DIRECTIONS FOR USE

This product is manufactured for specific use by professional mosquito abatement district personnel. Suggested dosage calls for the application of 5-7 lbs. of Mosquito Larvacide 1% Granule per acre. Make application of higher rates in water and breeding areas which are high in organic matter. Repeat applications may be used as necessary. Apply as a pre-hatch treatment to larvae breeding areas such as stagnant water, temporary rain pools, sloughs, log ponds and intermittently flooded areas.

CAUTION: This product is toxic to birds. Shrimp and Crab may be killed at application rates recommended on this label.

not apply where these are important resources. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

NOTE: Our recommendations for use of this product are based upon tests believed to be reliable. The use of this product being beyond the control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such or the results to be obtained if not used in accordance with directions or established safe practices. The buyer must assume all responsibility, including injury or damage, resulting from its misuse as such, or in combination with other materials.

WARNING

May be fatal if swallowed. May be absorbed through skin. May be injurious to the eyes and skin. Do not get in eyes or on skin. Wash thoroughly after handling. Wash contaminated clothing before re-use. Flush contaminated eyes with plenty of water and get medical attention. Avoid breathing spray mist or vapors. Avoid spraying food crops. Keep away from food, feedstuffs, and domestic water supplies.
