PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CATUION

Harmful if absorbed through skin.

IF SWALLOWED: Get medical attention

IF IN EYES: Immediately flush eyes with plenty of water.

IF ON SKIN: Wash with plenty of soap and water.

If irritation develops, get medical attention.

ENVIRONMENTAL HAZARDS

Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not apply when weather conditions favor drift from target areas.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABELING. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

5,000 Sq. Ft. Coverage for Bahia, Bermuda, Blue Grass, Fescue, Rye and Zoysia Grasses

7,500 Sq. Ft. Coverage for (spring application only) St. Augustine and Bent Grasses. Some temporary injury may occur with these grasses.

Do not exceed recommended rate because damage to lawn may occur. Do not apply to Dichondra, Centipede, Lippia and Clover lawns. Do not use this product for controlling weeds in vegetable gardens, flower beds or around shrubs or ornamental plants.

WEEDS CONTROLLED

Black Medic
Buckhorn
Butter cup
Canada Thistle
Carpet Weeds
Chickweed
Chicory
Clover
Cocklebur
Dandelion
Dog Fennel
English Daisy

Jimson Weed
Knotweed

Ground Ivy
Heal-All
Heartloaf Drymary
Henbit

Poison Oak
Purslane
Rag Weed
Red Clover
Red Sorrel
Sheep Sorrel

Wood Sorrell
Yarrow, and
other broadleaf
weeds

WHEN TO USE: Spray anytime during the growing season when weeds are actively growing (except as noted for St. Augustine and Bent Grasses). If lawn is extremely dry, water 1 to 2 days before spraying. Do not apply when temperatures are expected to exceed 85°F., or if rain is expected to occur within 24 hours following application. On new lawns wait until grass has reached a height of 2 inches before spraying. Also wait 3 weeks before putting in new grass seed or stolons.

After applying this product, many broadleaf weeds will begin to show visible signs of leaf curl within a few days. Some hard to control broadleaf weeds may require a second treatment in 3-4 weeks.

(HOSE-END SPRAYER INSTRUCTIONS)

HOW TO APPLY: Use any hose-end sprayer that is designed for use on lawns and makes a minimum of 15 gallons of finished spray, such sprayers are Ortho's Orthomatic Lawn Sprayer, Ortho's and Black Leaf's Lawn Sprayers (dilution ratio of 60 to 1). The following are adjustable/dial sprayers:

MANUFACTURER	SETTING
Super K-Gro	20
Melnor #94 & #95	11
Melnor #96 & #97	13
Gilmour #362	4
Gilmour #486	12

Special note: Some adjustable sprayers do not hold 32 oz. The above settings are based on using 32 oz. per 5,000 or 7,500 sq. ft. The entire contents of this bottle must be used to make the proper recommended application rate.

Determine area to be sprayed. Apply at a rate of 32 oz. (1 quart) per 5,000 square feet or 7,500 for spring application on St. Augustine or Bent Grasses. Fill sprayer jar with appropriate amount of this product. Do not dilute this product with water when filling sprayer jar. The water will automatically mix with this product during spraying. Attach sprayer to garden hose while holding sprayer at waist level, point in direction away from face and body. Slowly walk back and forth at a steady pace. Overlap slightly for uniform coverage. Do not exceed recommended rate because damage to lawn may occur.

(DISPOSABLE SPRAYER AND BOTTLE INSTRUCTIONS)

HOW TO APPLY: Shake well before applying. Connect spray nozzle to hose. Remove bottle cap and screw bottle into nozzle. Turn on the water at the tap. Place finger over hole on right side of nozzle and the Weed and Feed 15-0-0 will mix automatically at the proper ratio. Point in direction away from face and body. Slowly walk back and forth at steady pace. Overlap slightly for uniform coverage. Do not water fertilized lawn for at least 24 hours.

Marks on left side panel bottle indicate square feet covered.
