- IF IN EYES: Wash with water for at least 15 minutes and seek medical attention.
- IF ON SKIN: Wash with plenty of soap and water. Get medical attention if irritation persists.

Revised A/O 3/9/93

NOTIFICATION  
LABEL NOT REVIEWED  
PER FR NOTICE 88-4

DATE 6/30/93

**BEST AVAILABLE COPY**

IF INHALED: Remove victim to fresh air.

Note to Physician: There is no specific antidote. If swallowed, do not induce emesis and take care to avoid aspiration of stomach contents during gastric lavage. Give a saline laxative and supportive therapy.

#### ENVIRONMENTAL HAZARDS

This product is toxic to fish. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. Do not contaminate water used for irrigation or domestic purposes.

#### PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill or store near heat or open flame.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

IMPORTANT: Read the entire label before using this product. Apply this product only as specified on this label.

Care must be taken to keep this herbicide away from desirable flower beds, lawns and shrubs. Do not apply over roots of valuable trees or woody ornamental plants. Only apply herbicide outside the dripline of trees. Avoid spray drift to desirable plants.

Bare Ground Weed Control around: guard rails, airports, military installations, highway medians, pipelines, railroads, lumberyards, rights-of-way, buildings, storage areas, fences, pumps, machinery, fuel tanks, drainage ditches, recreation areas, roadways, industrial sites, light and power poles, fire hydrants, driveways, parking lots, walks, curbs, patios, and similar non-crop areas where plant growth is not desired.

Shake well and uniformly spray undiluted 2½ - 3 gals. per 1,000 sq. ft. (100-120 gals. per acre). Thoroughly wet all foliage to insure contact action. Best results are obtained when applications are made during or after weed emergence while growth is succulent. Where vegetation is tall and dense, use 5 gals. per 1,000 sq. ft. (200 gals. per acre). For control of hard-to-kill perennial weeds and grasses such as johnsongrass, bindweed and wild carrot, use 8-12 per 1,000 sq. ft. Although Riverdale Prometon 1.5 Vegetation Killer has considerable activity through foliar contact, much of its activity is through the roots and, therefore, adequate rainfall to move the chemical into the root zone is necessary.

Under conditions where the rainfall is high and the growing season long, a second application may be necessary to maintain a weed-free soil surface.

AS AN EDGING LIQUID: Shake well and uniformly spray 1 gallon per 60 sq. ft. of soil surface of a strip 4 inches wide, 180 feet long. To make a 4 inch band, hold applicator end about 6 inches from surface to be treated. To obtain wider band, rise container. Thoroughly wet all foliage and stems of undesired vegetation to insure contact action.....
