Spray From Center When Calm

Spray With Breeze If Windy

This new spray for use in picnic areas, patios, and backyards contains pyrethrins. The new high pressure Fog-a Yard Pyrethrin formula will kill insects up to 20 feet away. Pyrethrins are extracted from a daisy like flower grown in Kenya, East Africa.

DIRECTIONS:

SHAKE WELL BEFORE USING.

FOR FLYING INSECTS: Flies, mosquitoes, gnats. Stand with back to wind with arm outstretched. Spray area to be covered thoroughly, letting mist drift over area to be relieved. Repeat as necessary.

FOR CRAWLING INSECTS: Ants. Spray infested surface of patio or picnic area hitting as many insects as possible. Also spray legs of tables and chairs to repel crawling insects. Spray ant hills for best control. Repeat as necessary.

CAUTION: Contents under pressure. Never puncture or throw container into fire. Do not set container on stove, radiators or place where temperature will reach 120°F which may cause it to burst. Cover exposed food. Can be used around food products provided they are protected from contact during spraying. Keep out of reach of children.

ACTIVE INGREDIENTS: Pyrethrins, 0.25%; Technical Piperonyl Butoxide, 1.00% (equivalent to .80% (Butylcarbityl) (6Propylpiperonyl ether and 0.20% related compounds).

INERT INGREDIENTS: 97.75%.
