As to the placement of the AOAC Statement the Agency follows PR Notice 81-4 in which section III, paragraph E states:

"Confidential statements of formula must indicate the appropriate AOAC method number for each active component affected by this notice. Since the method numbers are periodically revised by the AOAC, the AOAC manual edition must be specified. Methods of analysis will not be considered confidential."

Therefore the AOAC Method Statement does not need to be on the label. It can be there if Riverdale so desires, but the only place it must appear is on the confidential statement of formula.

A stamped copy of the label is enclosed for your records.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed or absorbed through skin. Causes moderate eye injury (irritation). Avoid contact with skin, eyes, or clothing. Wear face shield or goggles, long pants, long sleeved shirt, shoes and gloves when mixing, loading or applying this product. Wash thoroughly with soap and water after handling. Do not allow persons and pets on treated areas until sprays have dried.

STATEMENT OF PRACTICAL TREATMENT

- IF IN EYES: Immediately flush eyes with fresh water for 15 minutes and get medical attention.
- IF SWALLOWED: Call a physician or Poison Control Center. Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give enything by mouth to an unconscious person.
- IF ON SKIN: Wash skin with plenty of soap and water. Get medical attention if irritation persists. Note to Physicians: Emergency information - call (...).

ENVIRONMENTAL HAZARDS

Drift or runoff may adversely affect non-target plants. Do not apply directly to water or wetlands (swamps, bogs, marshes, and potholes). Do not contaminate water when disposing of equipment washwaters or rinsate nor pour the washwaters on the ground; spray or drain over a large area away from wells, other water sectors and desirable plants. Do not apply this product through any type of irrigation system. Do not contaminate water used for irrigation or domestic purposes.

Most cases of ground water contamination involving phenoxy herticides Such as MCPA and MCPP have been associated with mixing/loading and disposal sites. Caution should be exercised when handling these phenoxy pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination. - Riverdale Duo Lawn Weed K. 1er

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ ENTIRE LABEL BEFORE USING. USE STRICTLY IN ACCORDANCE WITH LABEL FRECAUTIONARY STATEMENTS AND DIRECTIONS.

Duo Lawn Weed Killer is for effective control of lawn weeds and will not harm lawn grasses when used according to directions.

USE PRECAUTIONS

IMPORTANT: Do not use this product for controlling weeds in flower or vegetable beds or around shrubs or ornamental plantings. Do not spray exposed roots of desirable plants. Do not spray on Dichondra, Lippia, nor on grasses where desirable Clovers are present. Do not apply to newly indeed grasses until they have been mowed 3 times. Do not cut grass 1 to 2 days belore and after application. Do not reseed for 3 to 4 weeks after use. If lawn needs watering, water thoroughly before application. Do not water for 48 hours after application. Watering will wash off weed killing material. Do not apply if rainfall is expected within 48 hours. Avoid fine mists. Use a lawn type sprayer with a coarse spray as wind drift is less likely. Spray entire lawn, wetting weeds and lawn grasses. Do not exceed recommended rates because damage to turf may occur. Spray when air is calm to avoid spray drift that might injure desirable ornamental plants. Do not apply when temperature exceeds 90°F. Make new dilution for each use. Shake well before using.

BENT, COMMON BERMUDA, RED FESCUE, CENTIPEDE AND CARPET GRASSES:

GROWING SEASON - Use one-half recommended rate (2 tsp.) per gallon of water. Make 2 applications 20 days apart. Temporary injury may occur. Do not apply to Eichondra, Lippia, St. Augustine and Clover lawns.

DORMANT SEASON (WINTER): COMMON BERMUDA, CENTIPEDE, CARPET GRASSES: Use at regular rate (See Dilution Table) and apply when turf is dormant (brown). Reduce rate by one-half (2 tsp.) per gallon water when turf has greened up and is actually growing (See Growing Season above).

HARDY WEEDS: For hardy weeds such as Sheep sorrel, Dock, Thistle, and Morringglory in lawns and other turf areas, repeat application in 2 to 3 weeks if necessary.

Dilution Table					
Area To Treat	Water To Use	Amount of Duo Lawn Weed Killer to Use***			
200 sq. ft. 1200 sq. ft.	l gallon 6 gallons	4 teaspoonfuls 8 tablespoonfuls (4 vz.)			

*** Use one-half this rate for Bent, Bermuda, Red fescue, Centiped? and Carpet Grasses.

TO PREPARE REFILL FOR WEED KILLER: Measure 1 tablespoon of Duo Lawn Weed Killer into the empty container of Duo Weed Killer (24 oz. size) and then fill with tap water.
