ENVIRONMENTAL HAZARDS

This product is highly toxic to aquatic invertebrates. **DO NOT** apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

DO NOT contaminate water when disposing of equipment washwaters.

Groundwater Advisory

This chemical demonstrates the properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Note to Reviewer: the two statements in brackets below may be used as they relate to *Tilia* species:

[**DO NOT** apply this product by any application method, to linden, basswood or other *Tilia* species in the State of Oregon.]

[**DO NOT** apply this product by any application method, to linden, basswood or other *Tilia* species.]

6/11

OPTION 1 (existing approved specific use directions, simplified method)

This product comes ready to use with no mixing necessary. This product aids in ant management and controls sucking pests. It can be applied around shrubs and small trees by spreading directly beneath the base of the tree or shrub.

This product is for use on ornamental shrubs and small trees in outdoor landscapes and interior plantscapes. It is a systemic insecticide and will be taken up by the roots and translocated upward within the plant system. Therefore watering after application makes the product more available for uptake.

Systemic activity using this soil application treatment method can be delayed until the active ingredient is translocated throughout the plant. For this reason, applications work best when made prior to pest infestation or before pest populations become severe.

INSECTS CONTROLLED

- | | |
|------------------------------------|---|
| Adelgids | Leaf beetles (including Elm leaf & Viburnum leaf beetles) |
| Aphids | Leafhoppers |
| Black vine weevil (larvae in soil) | Psyllids |
| Japanese beetle (adults) | Whiteflies (including fig [ficus] whitefly) |
| Lace bugs | |

WHERE TO APPLY

Shrubs and small trees in outdoor landscapes and interior plantscapes.

USE RATE

Select rate according to height of shrub or tree: Up to 4 ft. – use ¼ to ½ cup; 4 to 8 ft. – use ½ to 1 cup. Use the high rate within the range for initial treatment and lower rates for re-application, if needed.

HOW AND WHEN TO APPLY

Spread appropriate rate evenly around the base of plant under foliage, whenever pests are seen or found. Re-apply as needed based on pest re-infestation or at 4 to 8 week intervals. Apply early before pest populations become severe. Irrigation or rainfall is necessary within 24 hours following application. Pull back mulch and weed barrier before application. **DO NOT** apply to frozen or water-logged areas, as this may decrease the product's effectiveness.

NOTE: 1 level cup is approximately 6 ounces of this product.

ANT MANAGEMENT

Use this product to control aphids and other sucking pests on ornamentals to limit the honey dew available as a food source for ant populations. Applications can then be supplemented with remedial sprays, bait placements or other ant control tactics to further reduce pest populations.

USE RESTRICTIONS

DO NOT apply near fish pools, ponds, streams or lakes.

DO NOT apply to soils which are frozen, waterlogged, or saturated which will reduce delivery of product into the root zone of the plants.

DO NOT apply more than 16 lbs of product (0.4 lbs ai) / acre or 0.37 lbs (6 oz.) of product / 1,000 square feet / year.

DO NOT use kitchen utensils to measure or apply this product.

OPTION 2 (new proposed alternate specific use directions for single application / yr)

This product comes ready to use with no mixing required. This product is for use on ornamental plantings in outdoor landscapes and interior plantscapes. It is a soil applied systemic insecticide and will be taken up by the roots and translocated upward within the plant system. Watering after application makes the product more available for uptake. Systemic activity can be delayed until the active ingredient is translocated throughout the entire plant.

HOW MUCH TO APPLY

Tree with one trunk: Measure distance (in inches) around tree trunk at chest height. A flexible tape measure is an appropriate method (tool). Apply [___ capfuls] [0.125 cup] (0.65 oz) of this product for each inch of distance around the trunk.

Trees with multiple trunks: Measure the distance (in inches) around each trunk at chest height and add together. Multiply this total by 0.75. This is the number of [___ capful] [0.125 cup] (0.65 oz) increments to apply around the tree trunk. Example: A tree has 3 trunks. They measure 16, 10, and 6 (inches) for a total of 32 (inches). 32 X 0.75 = 24 increments. [24 X 0.125 cups = 3 cups] [24 X ___ capfuls = ___ capfuls] [24 X 0.65 oz = 15.6 oz].

NOTE: the amount needed for trees w/ multiple trunks is less than the amount needed for a single trunk tree of same total diameter.

Shrubs: Measure the height of the shrub to the nearest foot. Apply [___capfuls] [0.375 cup] (2.0 oz) of this product for each foot (12-inches) of shrub height.

Container plants: Apply the quantity of this product specified for the size container being treated.

Before application, pull back any mulch or weed barrier that will inhibit even spreading and watering in of granules. Brush or wash off any granules adhering to plant foliage.

Trees: For trees with a distance around the trunk of [<] [less than] 30 ["] [inches] apply product to the soil in a circle around the tree a distance of approximately 2 feet out from the base of tree. For trees with a distance around the trunk of [>] [greater than] 30 ["] [inches] apply product to the soil in a circle 3-4 feet out from the base of the tree.

Shrubs: For shrubs [<] [less than] 3 feet tall, apply product evenly to the soil 1 foot out from the base of the shrub. For shrubs [>] [greater than] 3 feet tall, apply product evenly to the soil 2 feet out from the base of the shrub.

Container plants: Spread required amount of product evenly over the potting soil around the base of plant foliage and water thoroughly. For the first 10 days **DO NOT** water the container to the point that water overflows or leaks out the bottom of container.
