## CDB CLEARON FABRIC AND DIAPER SANITIZER

CDB CLEARON FABRIC AND DIAPER SANITIZER is recommended for stain removal and reduction of ammonia causing bacteria in institutional & commercial laundering of fabrics and diapers.

### DIRECTIONS FOR USE

Wet fabrics or diapers should be spin dried before the sanitizer is applied. Four (4) oz. of CDB CLEARON FABRIC AND DIAPER SANITIZER should be added for each 16 gallon wash load. Run this solution in the pre-wash, followed by the regular wash cycle with a good detergent. The above application gives 200 ppm available chlorine in the pre-wash cycle.

The sanitizing solution should be used promptly after mixing. If the solution is allowed to stand or is reused and tests show the level of chlorine has not been maintained, additional CDB CLEARON FABRIC AND DIAPER SANITIZER should be added, to give 200 ppm available chlorine in the pre-wash cycle.

### DIRECTIONS FOR STORAGE AND HANDLING

Store in a cool, dry, well ventilated area. Moisture contamination may liberate irritating and hazardous chlorine containing gases. Oxidizing material: Do not mix with other chemicals. Contact with organic matter may cause fire. Decomposes at 350-475° F with liberation of harmful gases. In case of decomposition, if possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

Do not reuse empty container. Rinse empty container thoroughly with clean water before discarding.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.
