

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact your regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use clean utensils. Do not add this product to any dispensing device containing residues of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases and possible generation of fire explosion. In case of contamination or decomposition do not reuse container. If possible isolate container in open air or well ventilated area. Flood with large volume of water, if necessary.

CDB-90 TABLETS

INDUSTRIAL WATER BIOCIDES

ACTIVE INGREDIENTS:
Trichloro-s-triazinetrione 99.4%

INERT INGREDIENTS: 0.6%
Provides 89% available chlorine

**KEEP OUT OF REACH OF CHILDREN
DANGER**

PRACTICAL TREATMENT: FIRST AID

If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately.
If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention.
If in eyes: Flush with cold water for at least 15 min. Get medical attention.

Manufactured by FMC CORPORATION

EPA Reg. No. 230-
EPA Est. No. 230-SWA-01

— TRADEMARK OF FMC CORPORATION —

CDB-90 industrial water biocide is recommended for use in either industrial cooling water or in industrial water for washing air.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Industrial cooling tower water:
For badly fouled systems add 3/4 to 1-1/2 pounds of CDB-90 industrial water biocide daily for each 10,000 gallons of system water. This provides 10 ppm and 20 ppm available chlorine respectively. Repeat each day until the system is free of visible fungi and algal slime. This condition is usually indicated when a free available chlorine residual of at least 1 ppm is found 4 hours after the treatment. When a system is under control add 2-1/2 or 5 oz. of CDB-90 industrial water biocide daily per 10,000 gallon of system water to provide 2 or 4 ppm free available chlorine respectively. These amounts may be raised or lowered as required and indicated by water conditions and by test for chlorine residual. Reliable test kits for testing free available chlorine are available and should be used. The CDB-90 industrial water biocide should be added directly from the container to a place in the system where it will be evenly mixed with the water.

Water for air washers:
In starting up a new system add 4 oz. to 6 oz. of CDB-90 industrial water biocide per 10,000 gallon of water in the system. This provides 4 or 5 ppm of free available chlorine respectively. For routine control add 3/4 to 1-1/2 oz. of CDB-90 industrial water biocide per 10,000 gallon of water daily. This will provide 0.5 or 1.0 ppm free available chlorine. These results may be raised or lowered as required and indicated by water conditions and tests for free available chlorine. Reliable test kits are available for testing chlorine and should be used.

STORAGE AND DISPOSAL

Keep product dry in tightly closed containers when not in use. Store in a cool dry well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place.
