The amendment referred to above, submitted in connection with registration under FIFRA, is acceptable provided that you:

1. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If this condition is not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6 (e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of this condition.

A stamped copy of the labeling is enclosed for your records.

Olin CDB CLEARON Industrial Water Biocide

Net Contents

CDB CLEARON industrial water biocide is recommended for use in either industrial cooling water or in industrial water for washing air.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Industrial Cooling Tower Water:

For badly fouled systems add 1 1/2 or 3 lbs. of CDB CLEARON industrial water biocide daily for each 10,000 gallons of system water. This provides 10 ppm and 20 ppm available chlorine respectively. Repeat each day until the system is free of visible fungi and algal slime. This condition is usually indicated when a free available chlorine residual of at least 1 ppm is found four hours after the treatment. When a system is under control add 5 or 10 oz. of CDB CLEARON industrial water biocide daily per 10,000 gallons of system water to provide 2 or 4 ppm free available chlorine respectively. These amounts may be raised or lowered as required and indicated by water conditions and tests for free available chlorine. Reliable test kits are available for testing chlorine and should be used. The CDB CLEARON industrial water biocide should be added

directly from the container to a place in the system where it will be evenly mixed with the water.

Water for Air Washers

In starting up a new system add 1/2 lb. to 1 lb. of CDB CLEARON industrial water biocide per 10,000 gallons of water in the system. This provides 4 or 5 ppm of free available chlorine respectively. For routine control add 1 1/4 to 2 1/4 oz. of CDB CLEARON industrial water biocide per 10,000 gallons of water daily. This will provide 0.5 or 1.0 ppm free available chlorine. These amounts may be raised or lowered as required and indicated by water conditions and tests for free available chlorine. Reliable test kits are available for testing chlorine and should be used.

Active Ingredient:
Sodium Dichloro-s-Triazinetrione
(Sodium Dichloroisocyanurate)
(Contains 55% Available Chlorine)
Inert Ingredients
