Beetle Grubs, Termites, Roaches
and Certain Other Pests

ORTHO ORTHO-KLOR[®]44 Chlordane Spray

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS. KEEP PESTICIDE IN ORIGINAL CONTAINER. DO NOT PUT CONCENTRATE OR DILUTE INTO FOOD OR DRINK CONTAINERS.

DIRECTIONS

Do not store diluted spray. Make new dilution for each use.

HOUSEHOLD PESTS: ANTS, SPIDERS, BOX ELDER BUGS, ROACHES (Outside buildings): Mix 2 Tablespoonfuls (1 oz.) in 1 gal. water. Apply with ORTHO garden hose sprayer or sprinkling can. Form a chemical barrier which helps to prevent these insects from entering house by treating thoroughly around outside house foundations, under porches, around garbage containers, along runways, and other areas where insects congregate. Spot treat nests in lawns, in and around trees or other infested areas.

SCORPIONS: Mix 10 Tablespoonfuls (5 ozs.) in 1 gal. water. Spray around doors, windows, cooling and heating ducts, plumbing pipes, around outside foundations and other scorpion infested areas or possible places that they might enter buildings.

ANTS, ROACHES, SPIDERS, SILVERFISH, BOX ELDER BUGS (Inside buildings): Mix 6 Tablespoonfuls (3 ozs.) in 1 gal. water. Spray or paint thoroughly trails only around door sills, window frames, openings around water pipes, heat ducts, electrical outlets, around cupboards and baseboards, and other areas where insects may enter. Do not contaminate food, utensils, dishes or drinking water. Repeat as necessary. May cause staining of finished surfaces.

LAWN PESTS: Mix 2 Tablespoonfuls (1 oz.) in 1 gal. water. For best results apply with an ORTHO Lawn Sprayer. Place ½ pint (8 ozs.) of ORTHO-KLOR 44 Chlordane Spray in sprayer jar, fill remainder of jar with water; mix, attach to sprayer and apply contents to 1,000 sq. ft. of lawn. When treating for lawn leaf feeders and surface pests such as **Armyworms, Fiery Skipper Larvae, Lawn Moth Larvae, Fleas, Chiggers, Mole Crickets**—Water (soak) lawn thoroughly before treatment and do not water again for 2 to 4 days after treatment. When treating for lawn root feeders and soil pests such as **Cutworms, Japanese Beetle Grubs, White Grubs, Wireworms, Brachymeris Grubs, Billbug Grubs**—Water heavily after treatment to wash spray down into soil. Do not wash spray away by flooding. **MOLES**—The above treatment for insects has proven effective in reducing damage by moles which feed on such insects. Keep children and pets off treated areas until the areas are well watered and have dried completely. Note: Birds feeding in treated areas may be harmed.

GARDEN SOILS: GRASSHOPPERS, JAPANESE BEETLE GRUBS, EARWIGS, WIREWORMS, CUTWORMS, CRICKETS, BILLBUG GRUBS, BLACK FLIE GRUBS, CRICKETS: Tomatoes, Broccoli, Beans, Squash, Cabbage, Cauliflower, Lettuce, Celery, Cucumbers, Peas, Zucchini, Yams—Mix 2 Tablespoonfuls (1 oz.) in 1 gal. water. Spray ground around plants. Work into top 4 inches of soil. For Earwigs, apply in damp, shady areas, around and under boards and similar places. Repeat as necessary. Do not apply to edible food crops after edible parts start to form.

TERMITES: To prevent and control these damaging insects spray a chemical barrier around your house foundation inside and outside. Use 4 Tablespoonfuls (2 ozs.) per gallon of water to treat 2 lineal feet of soil trench around the foundation of the house, not more than 15 to 18 inches deep. For trenches over 18 inches deep and up to 30 inches deep around the house foundation, apply 4 Tablespoonfuls (2 ozs.) per gal. of water to treat 1 lineal foot of trench. Treatment is fast and easy with an ORTHO Lawn Sprayer. Fill sprayer jar with 1 qt. (32 ozs.) of ORTHO-KLOR 44 Chlordane Spray, attach to sprayer and thoroughly soak 32 lineal feet of foundation wall and soil area as close to foundation wall as possible. For compacted soils, trench along foundation walls and treat the wall, the trench and the backfill soil. In heavy clay or muck soils a double dosage is recommended. Be careful to have adequate ventilation when treating areas under structures.

CAUTION: Harmful if swallowed. Do not breathe vapor or spray mist. Contact with skin can cause toxic symptoms. In case of contact with skin, wash with soap and water. For eyes, flush with water for 15 minutes, get medical attention. Wash hands after use. Avoid contamination of feed and foodstuffs. Do not use on household pets or humans. **DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.** Do not apply to plants or lawns that are not well irrigated or when air temperature exceeds 90°F. Do not contaminate drinking water. When container is empty, immediately wash thoroughly and destroy. Never re-use.

Toxic to fish and wildlife. Do not contaminate ornamental fish ponds. This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.
