ISOTOX Seed Treater (F) is a formulation for use in the treatment of seeds for protection against wire worms, seed corn maggots and certain other soil borne insects, as well as added fungicidal protection at planting time. Also repellent to pheasants. Where Seeding Blight, Damp Off or Seed Decay normally occur, combine with a full dosage of protective fungicide.

ISOTOX Seed Treater (F) may be used on corn seed previously treated with a protective fungicide.

**DIRECTIONS**  
APPLY IN PLANTER BOX USING DESIGNATED AMOUNT PER 100 LBS. SEED. MEASURING CUP ENCLOSED. One level cup contains approximately 4 ounces of product.

For improved mixing of product with seed, the following procedure is suggested. Fill planter box only half full of seed, add half the required amount of ISOTOX Seed Treater (F) and mix thoroughly with a stick. Then put remainder of seed in planter box and add the rest of the required ISOTOX Seed Treater (F), mixing thoroughly again. Good results are also obtained by pre-mixing seed with ISOTOX Seed Treater (F) in a suitable container, then pouring treated seed into planter box.
