

Active Ingredient	By Wt.
Petroleum Oil	99%
Inert Ingredients	1%
Petroleum Oil Min. Unsulfonated Residue	92%
Petroleum Oil Classification—Light-Medium	
U. S. Patent Nos. 2,109,095 — 2,134,158	

KEEP PESTICIDE IN ORIGINAL CONTAINER. DO NOT PUT CONCENTRATE OR DILUTE INTO FOOD OR DRINK CONTAINERS.

ORTHOL-K READY MIX Light Medium is an emulsive summer oil

BANANAS: Black Leaf Streak is caused by a virus that is spread by insects and causes a mottled blackening of the leaves. To control this disease, remove or destroy infected plants and use insecticides to control the insects.

- **CITRUS TREES:** Black Scale, Citricola Scale - Use 1½ to 2 gallons to make 100 gallons of diluted spray. Apply in July and August soon after the first batch.

ORANGES: Red Scale, Yellow Scale—Use $1\frac{3}{4}$ to 2 gallons to make 100 sq ft of diluted spray. Apply in August to December on Navels and August to March on Valencias. Navels may be treated in water after the fruit has been picked and before the trees bloom.

LEMONS: Red Scale, Yellow Scale—Use 1¾ to 2¼ gallons to make 100 gallons of diluted spray. ORTHOL-K READY-MIX Light-Medium is used at any season on Lemons. For best results spray Lemons during the winter and spring months when the Red Scale are more easily controlled and the trees generally less reactive to oil sprays.

ORANGES, LEMONS: Purple Scale—Use 2 to 2½ gallons to make 100 gallons of diluted spray. Apply in August, September and October after the Spider Mite has been killed. Red Spider Mite; Red Citrus Scale—Apply 2 to 2½ gallons to make 100 gallons of diluted spray. Apply in August, September and October.

As citrus trees are usually infested with more than one of the previously mentioned pests at the same time or during the year, it is suggested that the information obtained from this report be submitted to the Department Station relative to a control program that will take many of the ordinary pests into consideration and possibly result in a reduction in pest control operation for the year.

KEEP OUT OF REACH OF CHILDREN

ORTHOL-K READY-MIX Light-Medium is prepared from a relatively light spray which makes it safe to use on Orange trees over a large part of the year. It is suggested, however, that its use be limited shortly to be harvested or on young Oranges. At yet later stages in the trees be avoided or used only in very diluted form.

ORTHOL-K READY-MIX Light-Medium is a ready-to-use, prepackaged, preblended concrete repair mortar. The product is supplied in 50 lb. bags and is used to repair concrete surfaces. The product is applied to the surface of the concrete to be repaired, and the mortar is troweled into the hole. The mortar is then troweled smooth and finished with a trowel. The product is available in two grades, Light-Medium and Heavy.

the 1990s, the number of people in the world who are illiterate has increased from 1.2 billion to 1.5 billion. The number of illiterate people in the world is projected to reach 1.7 billion by the year 2015. The number of illiterate people in the world is projected to reach 1.7 billion by the year 2015.

the present study, the mean diameter of the particles was 1.5 μ m. The particles were suspended in a 0.1% aqueous solution of polyvinylpyrrolidone (PVP) and dispersed in a 10% aqueous solution of sodium lauryl sulfate (SLS). Such a system is known to give a stable dispersion, fitting the model of a homogeneous mixture of particles and polymer, which is well known to be a reasonable approximation, except those caused by the interaction of the particles with the boundary, temperature, and the water.
