

ORTHO

ORTHO-KLOR® 74 Chlordane Spray

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL WARNINGS AND DIRECTIONS.

KEEP PESTICIDE IN ORIGINAL CONTAINER. DO NOT PUT CONCENTRATE OR DILUTE INTO FOOD OR DRINK CONTAINERS.

DIRECTIONS

Do not store diluted spray. Make a new dilution for each use.

SOD OR ORNAMENTAL TURF: JAPANESE BEETLE GRUBS (Federal/State Quarantine Programs) — Mix 1 Tablespoonful (½ fl. oz.) in 1 gal. water per 150 sq. ft. area. For best results apply with an ORTHO Lawn Sprayer. Place ¾ fl. oz. of ORTHO-KLOR 74 Chlordane Spray in sprayer jar, fill remainder of jar with water; mix, attach to sprayer and apply contents to 1,000 sq. ft. Water thoroughly after treatment to wash spray down into soil. Do not wash spray away by flooding. Do not apply to sod or ornamental turf that is not well irrigated or when air temperature exceeds 90°F.

GARDEN PEST: BLACK VINE WEEVIL (Michigan Only): Japanese Yew — Spray at the rate of 1 teaspoonful per gallon water around base of plants, working into top 4 inches of soil. Repeat as necessary. Do not apply to plants that are not well irrigated or when air temperature exceeds 90°F.

TERMITES — Use 2 Tablespoonfuls (1 oz.) per gallon of water to treat 2 linear feet of soil trench around the foundation of the house, not more than 15 to 18 inches deep. For trenches over 18 inches deep and up to 30 inches deep around the house foundation, apply 2 Tablespoonfuls (1 oz.) per gallon of water to treat 1 linear foot of trench. Treatment is fast and easy with an ORTHO Lawn Sprayer. Where the trench is no deeper than 18 inches, add 16 oz. of ORTHO-KLOR 74 Chlordane Spray to the sprayer jar, fill jar with water and mix thoroughly, attach to sprayer and thoroughly soak 32 linear feet of foundation wall and soil area as close to foundation as possible, around each of the piers or any plumbing in contact with the soil and porch fills, etc. under houses. For compacted soils, trench along foundation walls and treat the wall, the trench and the backfill soil. In heavy clay or much soils, a double dosage is recommended. Be careful to have adequate ventilation when treating areas under structures. The objective is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment. It is suggested that you consult the State Extension Service for advice.

WARNING: May be fatal if swallowed. Do not breathe vapor or spray mist. Contact with skin can cause toxic symptoms. In case of contact with skin, wash with soap and water. For eyes, flush with water for 15 minutes, get medical attention. Wash hands after use. Keep children and animals off treated areas until these areas are dry. Do not use on household pets or humans.

Note to Physicians: Emergency Information — call (415) 233-3737.

Avoid contamination of feed and foodstuffs. **DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.** Do not contaminate drinking water or use near fishponds, etc. When container is empty, immediately wash thoroughly and destroy. Never reuse.

This product is toxic to fish, birds and other wildlife. Birds and other wildlife in treated areas may be killed. Keep out of any body of water. Do not apply when weather conditions favor drift from areas treated. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.
