 comes in contact with the eyes, and a sales or face shield when handling.  
 Avoid contact with skin. Avoid breathing dust with this unit  
 after handling.

[illegible]

for at least 15 minutes and see a doctor. If a child has a large amount of water to drink, more than 10 ounces in 1 hour, he or she is at risk for water intoxication. Symptoms include vomiting, diarrhea, headache, dizziness, and confusion. If a child has these symptoms, with only a small amount of water to drink, a doctor should be called. If a child has a large amount of water to drink, a doctor should be called. If a child has a large amount of water to drink, a doctor should be called. If a child has a large amount of water to drink, a doctor should be called.

~~1. The first step in the first, leading to the second, is to establish a direct line of communication with the enemy. This is done by sending a message to the enemy, which is received by the enemy. The message is then sent back to the sender, who then sends a message to the enemy, and so on. This process is repeated until the enemy is completely isolated from the rest of the world.~~
