OCT 1 1985

Ms. Jackie DiMaggio
Chevron Chemical Company
Ortho Agricultural Chemicals Division
940 Hensley Street
Richmond, CA 94804-0036

Dear Ms. DiMaggio:

Subject: Ortho-K Ready-Mix Medium
Add Precaution to the Statement
of Practical Treatment
EPA Registration No. 239-2156
Your Application Dated April 23, 1985 and 7/29/85

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

Based on the discussion presented in your July 29, 1985 letter, the revision we requested your company make to the statement of practical treatment for eyes is not required. Your statement can remain as stated on the attached label.

Sincerely yours,

Jay S. Ellenberger
Product Manager (12)
Insecticide-Rodenticide Branch
Registration Division (TS-767)

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS CAUTION

Harmful or fatal if swallowed. Avoid breathing vapor. Avoid contact with eyes or skin.

STATEMENT OF PRACTICAL TREATMENT

If swallowed, DO NOT MAKE PERSON VOMIT. CALL A DOCTOR IMMEDIATELY. Ingestion of this product or subsequent vomiting can result in aspiration of light hydrocarbon liquid which can cause pneumonitis. Note to Physicians: Emergency Information - call (415) 233-3737.

ENVIRONMENTAL HAZARDS

Do not apply directly to water.

PHYSICAL OR CHEMICAL HAZARDS

Do not weld, heat or drill container. Residue may ignite with explosive violence if heated sufficiently.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL, USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS, AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

REENTRY STATEMENT

Keep all unprotected persons out of operating areas or vicinity where there may be drift. Do not enter treated areas without protective clothing until sprays have dried.

Certain states may require more restrictive reentry intervals; consult your State Department of Agriculture for further information.

Written or oral warnings regarding use of protective clothing and accidental exposure must be given to workers who are expected to be in treated areas or in areas about to be treated.

STORAGE AND DISPOSAL

PROHIBITIONS

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Open dumping is prohibited.

STORAGE

Keep pesticide in original container. Do not put concentrate or dilute into food or drink containers. Protect from freezing. Keep this drum in the shade. For help with any spill, leak, fire or exposure involving this material, call day or night (415) 233-3737.

PESTICIDE DISPOSAL

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL

Triple rinse (or equivalent). Offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or dispose of by other procedures allowed by State and local authorities.

Form 212-02 EPA Reg. No. 239-2156-AA

ACCEPTED
with COMMENTS
in EPA Letter Dated

OCT 01 1985

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.

239-2156

DIRECTIONS

Consult the Local Experiment Station about time of application. Do not apply Summer Oil Sprays within 30 days after applying sulfur. Do not apply any oil spray when temperature exceeds 90° F. Do not apply oil sprays during periods of excessively low humidity caused by dry winds.

Black Scale and Citricola Scale on Citrus Trees: Use 1½ to 1¾ gals. to make 100 gals. of diluted spray. Apply in July and August as soon as the Scale have hatched. Navel Oranges may be sprayed in winter after the first fruit has been picked and before the trees blossom, using 2 gals. to make 100 gals. of diluted spray.

Purple Scale on Oranges and Lemons: Use 1½ or 2 gals. to make 100 gals. of diluted spray. Apply in September and up to October 15th on Oranges. On Lemons, apply in September, October, November or December, after the Scale have hatched.

Red Scale and Yellow Scale on Oranges: Use 1½ to 2 gals. to make 100 gals. of diluted spray. Apply during August, September, and up to October 15th.

Red Scale on Lemons: Use 1½ to 2½ gals. to make 100 gals. of diluted spray. ORTHOL-K Ready-Mix Medium can be used any month of the year on Lemons. It is suggested that this spray be used during the winter and spring months when the Red Scale are more easily killed and the trees generally less reactive to Oil Sprays.

Citrus Red Spider Mites and Six-Spotted Mites on Oranges and Lemons: Regular spraying with ORTHOL-K Ready-Mix Medium against Scale ordinarily holds Citrus Red Spider Mites and Six-Spotted Mites under control. For special treatment use 1½ gals. to make 100 gals. of diluted spray. Apply during August, September and up to October 15th on Oranges (Navel Oranges may be sprayed in winter after the fruit is picked and before trees blossom) and whenever necessary on Lemons.

PRECAUTIONS FOR THE USE OF OIL SPRAYS ON CITRUS TREES
ORTHOL-K Ready-Mix Medium is prepared from a medium type of Spray Oil which is not sufficiently volatile to permit its use over ripe fruit or on young Oranges not firmly set on the trees or on Orange trees after October 15th because of the possibility of interference with the blossoming the following spring. Pick off ripe fruit before spraying Lemons. Trees that are weakened by Red Spider Mites will usually shed foliage and fruit, when treated with Oil Sprays, to a degree, depending on the severity of the Spider injury.

As Citrus Fruits mentioned pests, the beginning of the Station or State program that will and possibly res the year.

ORTHOL-K Ready-Mix Medium is a pressure while th tained continually any cause, allow starting to spray.
