**DIRECTIONS**

For control of Chickweed and Clover apply ORTHO Chickweed & Clover Control any time weeds are actively growing. Applications made in the spring and fall when the weeds are small and the temperature is low are most effective.

**HOW TO USE**

For best results, use an ORTHO hose sprayer. Refer to table for recommended dilution. If lawn needs watering, water thoroughly before application.

**DO NOT WATER FOR 48 HOURS AFTER APPLICATION.** Spray entire lawn, wetting weeds and lawn grasses; do not overspray. Spray when air is calm to avoid spray drift that might injure desirable ornamental plants. Do not apply when temperatures are expected to exceed 85°F for 24 hours.

**NEWLY SEEDED LAWNS** may be treated after they have been mowed at least 3 times.

Do not apply to Dichondra, Lippia, Clover and St. Augustine grass lawns. May injure Seaside, Arlington and Congressional bents.
