DIRECTIONS

VOLCK Supreme-DIAZINON Combination contains DIAZINON plus a superior type oil. This product should be used for dormant applications to fruit and nut crops in the Western States. When applied as directed, VOLCK Supreme-DIAZINON Combination is an effective treatment against most of the over-wintering insects and mite eggs. Make a dormant spray as soon as possible, but not before there has been enough rain to replenish soil moisture and to soak the trees so the bark is noticeably moist. Mix with water at the rates given below and apply as a dilute dormant or concentrate spray. When concentrate sprays are used, increase the concentration of the spray mixture so that the amount of product per acre will be equivalent to the dilute spray (400-600 gallons/A.).

READ THE LABEL

KEEP OUT OF REACH OF CHILDREN

CAUTION: Harmful if swallowed. May be absorbed through the skin. Do not breathe spray mist. Do not get in eyes, on skin, or on clothing. Wash thoroughly after handling. Note to Physicians: Emergency Information - call (415) 233-3737. Atropine is antidotal. 2 PAM is also antidotal and may be administered in conjunction with atropine. Avoid contamination of food and feed. Keep out of reach of domestic animals. Do not use on humans, household pets, or livestock.

This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Keep out of lakes, streams, or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label. Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.
