

ORTHO Mole Cricket Bait

Contains BAYGON® Insecticide
FOR INDOOR AND OUTDOOR USE

Also controls Roaches and Field Crickets
Treats 6,000 Sq. Ft. of Lawn

Ready-To-Use Granular Bait

Active Ingredient	By Wt.
2-(1-Methylethoxy)phenyl methylcarbamate	2%
Inert Ingredients	98%

BAYGON® Reg. TM of Farbwerke Bayer GmbH, Leverkusen

Keep out of reach of children

CAUTION

See side panel for additional precautionary
statements.

NET WT. 3 LBS.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed or absorbed through the skin. Do not breathe dust or vapors. Avoid contact with skin. Wash thoroughly after using. Do not contaminate feed or foodstuffs. Do not use on food crops.

STATEMENT OF PRACTICAL TREATMENT: If swallowed, give a large amount of water to drink, make person vomit, and call a doctor. If on skin, wash skin thoroughly with soap and water. If in eyes, wash eyes immediately with fresh water for at least 15 minutes. If irritation continues, see a doctor. **Note to Physicians:** Emergency Information - call 415-233-3737. Atropine sulfate is antidotal.

ENVIRONMENTAL HAZARDS: This product is toxic to wildlife. Birds feeding on treated areas may be killed. This product is toxic to fish. Keep out of any body of water.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

ORTHO Mole Cricket Bait is a ready-to-use product that controls Mole Crickets, Field Crickets and Roaches. It gives rapid kill of these insects including Roaches resistant to certain chlorinated hydrocarbon and phosphate insecticides.

DIRECTIONS

Mole Cricket Control (Florida Only): Mole Crickets are soil inhabiting insects that damage lawns by feeding on grass roots and by forming mole like tunnels that loosen the soil causing the grass to dry out. The adults grow to 1½ inches long, are brownish and have flattened front legs well adapted for tunneling. Feeding and tunneling occurs primarily at night. The meandering tunnels are easily seen in short or newly planted lawns. Heavily infested lawns gradually turn brown and die.

How To Apply: For best results the lawn should be mowed and watered thoroughly before application. Apply ORTHO Mole Cricket Bait at the rate of ½ lb. to cover 1,000 sq. ft. For fast easy application use an ORTHO WHIRLYBIRE Spreader. Using setting No. 1, apply one WHIRLYBIRE full (1½ lbs.) to 3,000 sq. ft. Apply at dusk when over night rains are not expected. If rain should occur within 36 hours after treatment, the lawn should be retreated.

Roach and Field Cricket Control: For use in and around homes, apartment buildings, stores and restaurants—Apply bait lightly to floors under sinks and refrigerators and in other areas such as cracks and crevices where pests may hide but which are inaccessible to children. Use approximately 4 oz. of bait per 1,000 sq. ft. of treated area. Scatter lightly so that bait is barely visible. Repeat as necessary. Keep out of reach of children.

Important: Do not apply to animals. Do not treat portion of buildings where pets can feed on bait. Do not put bait in piles. Do not broadcast on floors inside that are likely to be contacted by children or pets. Do not use on food crops.

STORAGE AND DISPOSAL

STORAGE: Keep pesticide in original container. Do not concentrate or dilute into food or drink containers. Avoid contamination of feed and foodstuffs. Store in a cool, dry place, preferably in a locked storage area.

DISPOSAL: PRODUCT—Partially filled bag may be disposed of by securely wrapping original container in several layers of newspaper and discard in trash. **CONTAINER**—Do not reuse bag. Discard bag in trash.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.
