Equivalent to 0.80% (butylcarbityl) (6-propylpiperonyl) ether and 0.20% other related compounds.	
*MGK 264, Insecticide Synergist	

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS.

This insect fogger will treat an unobstructed area of approximately 15 feet x 25 feet (375 sq. ft. 30 feet x 25 feet of area with 8 foot ceilings). If area is larger, use additional foggers. The fine aerosol particles kill exposed and hidden insects of many types: moths, wasps, silverfish, cockroaches, spiders, mosquitoes, fleas and crickets.

NET WT. 6.2 OZ.

READ THE LABEL

KEEP OUT OF REACH OF CHILDREN

CAUTION: Keep out of reach of children. Note to Physicians: Emergency Information: call (415) 233-3737. When used in an enclosed area, vacate premises during treatment and ventilate the area once treatment is completed. Food should be removed or covered during treatment.

DIRECTIONS

FOR TOTAL RELEASE: Complete contents empty automatically. Remove pets, birds and cover fish aquariums before spraying. Remove all foods, dishes, utensils and other equipment used for handling food. (If not possible, cover with newspapers.) Close doors and windows. Turn off fans, air conditioners and extinguish open flames. In order to do a more effective job, leave cupboards, closets and trunks open.

Place can on a raised area such as a table, spread paper under the can to protect the area directly beneath the spray head and can. Remove cap, tilting can away from your face, latch the hook firmly over rim of can by placing thumb over the arrow and pressing forward (see illustration). Leave the room; the spray will continue until the complete contents have been released. For maximum effectiveness, keep treated area closed for 2 hours or more, then open windows and doors and allow space to air for 30 minutes.

Tilt top of can away from your face. Put thumb over arrow.

Push forward, latch hook over rim.

Leave room; can empties itself.

FOR OCCASIONAL SPRAYING: Do not lock top. Spray in short bursts, pushing latch hook forward, and spray upwards with a circular motion for 5 to 10 seconds for an average room. Keep room closed for 15 to 20 minutes. Then air room out for 15 minutes. Do not use in a total release type treatment after using annually.

SUGGESTION: For long term control of crawling pests such as roaches, crickets, spiders, silverfish, etc., use ORTHO Ant, Roach and Spider Spray prior to activating the Total Release program.

WARNING: Do not use under fire. Do not use near open flame or other heat source. Do not use near open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator.

NOTICE: Before spraying all equipment, furniture and floors in enclosed area with directions.
