*N-ethyl bicycloheptene dicarboximide	1.67%
Petroleum distillate	11.83%
Inert Ingredients	85.00%

*Equivalent to 0.20% active ingredient as pyrethrin.
 **and 0.20% other related compounds.
 ***MCK 2164 Insecticide Synergist

CAUTION:
Keep out of reach of children.
See back panel for additional cautions.
NET WT. 6.2 OZ.

ORTHOTM

HI-POWERTM

Indoor Insect Fogger

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS.

The contents of this container will treat an unobstructed area of approximately 6,000 cubic feet (750 sq. ft., 30 feet x 25 feet of floor space with standard 8 foot ceiling). If area is larger, use additional containers. The fine aerosol particles kill exposed and accessible stages of small flying moths, wasps, silverfish, cockroaches, flies, gnats, ants, mosquitoes, fleas and crickets.

DIRECTIONS

FOR TOTAL RELEASE: Complete contents empty automatically. Remove pets, birds and cover fish aquariums before spraying. Remove all foods, dishes, utensils and other equipment used for handling food (if not possible cover with newspapers). Close doors and windows. Turn off fans, air conditioners and extinguish open flames. In order to do a more effective job leave cupboards, closets and trunks open. Place can on a raised area such as a table, spread paper under the can to protect the area directly beneath the spray head and can. Remove cap, lifting can away from your face, latch the hook firmly over the rim of can by placing thumb over the arrow and pressing forward. Leave the room; the spray will continue until the complete contents have been released. For maximum effectiveness, keep treated area closed for 2 hours or more, then open windows and doors and allow space to air for 30 minutes.

FOR OCCASIONAL SPRAYING: Do not lock top. Spray in short burst by pushing latch hook forward. Point spray upwards with a circular motion for 5 to 10 seconds for an average room. Keep room closed for 15 to 20 minutes. Then air room out for 15 minutes. Do not use as a total release type treatment after using manually.

SUGGESTION: For adding residual control of crawling pests such as roaches, earwigs, ants, spiders, silverfish, etc., use ORTHO Ant, Roach and Spider Spray prior to activating the Total Release program.

CAUTION: Keep out of reach of children. Avoid contact with eyes and skin.

Note to Physicians: Emergency Information - call (415) 233-3737.

When used in an enclosed area, vacate premises during treatment and ventilate the area once treatment is completed. Foods should be removed or covered during treatment.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame.

Exposure to temperatures above 130° F. may cause bursting. Never throw container into fire or incinerator.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.
