SHAKE CAN WELL BEFORE USING.

DIRECTIONS

For best results, use throughout the growing season to prevent buildup of insect populations. Spray plants from a distance of 3 to 4 feet using short bursts (one second). To prevent injury to plants, avoid visibly wetting the foliage.

Apply in the early morning or late evening when the air is still, treating all foliage with particular attention to the underside of leaves. Contact insects directly whenever possible. Repeat applications at 7 to 10 day intervals or after heavy rains. Do not apply to food crops within one day of harvest.
