In case of contact, immediately flush eyes or skin with plenty of water. For eyes, get medical attention. If swallowed, give a large amount of water to drink and induce vomiting. Get medical attention immediately. Wash thoroughly after handling.

Note to Physicians: Emergency Information - call 415 233-3737.

ENVIRONMENTAL HAZARDS

Keep out of lakes, ponds and streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

To Open: Remove cap by squeezing sides at arrows while unscrewing.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

ORTHO Rose Disease Control contains the active ingredient Triforine, an effective fungicide which will control and prevent black spot, powdery mildew and rust—the three most important diseases of roses. Used as directed, ORTHO Rose Disease Control will not harm rose flowers or foliage. This product also controls powdery mildew on calendula, crocodyria, dahlia, euonymus, Jerusalem thorn, lilac, phlox, photinia, snapdragons and zinnias. It also controls poplar leaf rust on poplars, aster rust on asters and carnation rust on carnations.

DIRECTIONS

For control of aster rust on asters and carnation rust on carnations use ORTHO Rose Disease Control at the rate of 2 teaspoonsful per gallon of water. For all other uses, use ORTHO Rose Disease Control at the rate of 1 Tablespoon-

DANGER

See side panel for additional precautionary statements.

SEP 22 1982

NET CONTENTS 1 QT.

1 qt. 12 fl. oz. per gallon of water. Spray thoroughly to cover all plant surfaces (both upper and lower leaf surfaces) including new growth. For best results apply with an ORTHO SPRAY-ETTE, ORTHO Lawn and Garden Spray, or pump up sprayer. Use mixture at once. Does not require the addition of wetting agents.

WHEN TO USE

To prevent disease, begin spraying with ORTHO Rose Disease Control when first sign of listed diseases appear in the spring. Apply every 7 to 10 days during the spring and fall. However, if weather conditions that encourage the growth and spread of the disease causing fungi occur during the summer months, it may be necessary to continue spraying throughout the growing season. **NOTE:** If infection has already occurred on the plants at time of spraying, follow a 7 day application schedule to control the fungus. Then continue on a 7 to 10 day application schedule to prevent re-establishment of the disease. Leaves on which spots have already developed will not clear up, but the unaffected leaves will be protected if a regular spray program is followed.

Combination Spray with Insecticides on Roses — ORTHO Rose Disease Control may be mixed with ISOTOX Insect Killer or ISOTOX Insect Spray, or ORTHENE Insect Spray or ORTHENE Systemic Insect Spray, or ORTHO Malathion 50 Insect Spray, or ORTHO DIAZINON Insect Spray, ORTHO Liquid SEVIN. Follow directions on each label for insect control. Apply these mixtures only when both an insect and a disease is claimed on the labels at present.

STORAGE AND DISPOSAL

Avoid contamination of feed and foodstuffs.

Keep pesticide in original container.

Do not put concentrate or dilute into food or drink containers.

Do not store diluted spray.

Do not reuse empty container.

Wrap container and put in trash collection.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with directions.
