Ready-To-Use Spot Weed & Grass Killer

Gives Complete Kill of Tough Annual and Perennial Grasses and Broadleaf Weeds in Flower Beds, Around Trees and Shrubs, in Lawns, Walks, Driveways, in Gravel or Park Ground Mulch.

ORTHO Ready-To-Use Spot Weed & Grass Killer is formulated to kill annual and perennial weeds. The weed killer moves to the growing parts of the plant. Visible effects usually appear within 1 week on most weeds with complete kill in 2 to 4 weeks.

HOW TO USE

Apply with hand or trigger sprayer. Sprayer nozzle should be adjusted to give a fine spray for applying to cover area of weeds. Spray directly on weeds. Stand close to weed (1 to 2 feet) with spray directed at weed and away from foliage of desirable plants. Do not overspray. One application usually kills most weeds. If certain tough weeds, (e.g., Bromus, Poa, and Poa) are not completely killed, repeat application. This product is not intended to be used on desirable vegetation. Contact with desirable vegetation may result in injury 3 to 4 days after application.

IMPORTANT: ORTHO Ready-To-Use Spot Weed & Grass Killer is a systemic herbicide that will kill other plant tissue. Be careful when spraying around desirable plants. Avoid spraying under or directly on desirable plants. Do not apply within 24 hours of application as weeds may be killed and other plants may be injured. Contact with desirable plants may result in injury 3 to 4 days after application.

For initial use, tilt sprayer slightly upward to dispel air from system.

TO REFILL

Add 1 part of ORTHO Spot Weed & Grass Killer to the empty container and 2 parts of clean tap water to make the 0.6% solution. Example: 2 oz. of product plus 18 oz. of water. See label for more detailed directions.

STORAGE AND DISPOSAL

Store in original container out of reach of children. When empty container is cleaned, wash container and put in trash collection. Keep for disposal.

NOTICE: Buyer assumes responsibility for safety and proper use of this product.
