WHEN TO APPLY

Apply any time that vegetation is actively growing. Warm, sunny weather will accelerate systemic movement from leaves and stems down to the roots to give complete kill. Heavy lawn grasses are difficult to control; persistent weeds such as Bermudagrass, amblemulch, dandelion, or Canada thistle may require a repeat application if regrowth occurs. For best results, apply on a sunny day when the daytime temperature is at least 40°F. Apply only when the air is calm. Do not use on or around edible feed or food crops.

HOW TO APPLY

GENERAL WEED & GRASS CONTROL: Use 1.0 to 1.5 quarts of ORTHO Systemic Weed & Grass Killer per 1,000 sq. ft. of area to be treated. Apply with a backpack or hand sprayer.

To apply with an ORTHO ORTHO SEPARATEE Hand Sprayer, add 1.0 to 1.5 quarts of ORTHO Systemic Weed & Grass Killer to the sprayer tank with water to fill. Do not
