WHEN TO APPLY: Apply when vegetation is actively growing. Apply only when the air is calm to prevent drift Rainfall within 24 hours may reduce effectiveness. Do not use on or around edible feed or food crops. [reentry icon] People and pets may enter treated area after spray has dried.

[9/23/97 Notification] Alternate reformatted text for increased understanding by consumer

WHEN TO APPLY

- Apply when weed is leafed out and actively growing.
- Apply when air is calm to prevent drift to desirable plants.
- Rain within 24 hours after application may reduce effectiveness.
- Wilting or yellowing will occur in 2 to 6 weeks. Hard to kill weeds may require a repeat application if regrowth occurs.

Note: Contact with Poison Oak or Poison Ivy anytime of the year can cause an allergic reaction. Handle dead plants with rubber gloves. Dispose of plants & rubber gloves in tightly sealed garbage bags.

IMPORTANT: Do not use on or around edible feed or food crops.

HOW TO APPLY FOLIAGE SPRAY: Mix 4 fl oz per gal water and apply to thoroughly, wet all leaves, stems, and trunks. Application to mature foliage is preferred. Use low pressure and coarse spray pattern to reduce drift which may damage desirable vegetation. Wilting or other symptoms will occur in 2 to 6 weeks. Certain hard-to-control species, such as Poison Oak, Poison Ivy, Blackberries, and Honeysuckle may require retreatment

MIXING INSTRUCTIONS

Tank Sprayer

Add 4 fl oz (8 Tbs) to 1 gal of water.

Ortho® Dial'n Spray®

- Set dial to 4 oz.
- For each gal of spray add 4 fl oz to sprayer jar.
- **DO NOT** add water.
- After spraying, unused product can be poured back into its original container.

1 Tablespoon (Tbs) = 3 teaspoons (tsp) 1 fl oz = 2 Tbs

HOW TO APPLY

- Use coarse spray pattern to reduce drift to desirable plants.
- Spray weed to thoroughly wet foliage, stems and trunk.
- Do not spray plants or grasses you like - they may die too. Not recommended for weed control in lawns.
- If weed is growing around desirable plants, shield plants from drift with a sheet of cardboard or plastic; or cut weed at base & treat as directed for stumps.
- If desirable plant is accidentally sprayed, rinse off immediately with water.

For Stumps

- Apply product undiluted with a paint brush to the entire freshly cut stump, including the cut surface, remaining trunk & exposed roots.
- Do not reuse paint brush. Wrap brush in newspaper & put in trash.

For Vines

- If weed is growing up poles, fences or mature tree trunks, spray to thoroughly cover weed up to a height of 3 to 4 feet.
- If weed is climbing a shrub, to avoid damage to shrub, cut weed at base & treat as directed for stumps.

[Measuring cap packaging]

MEASURING CAP: The cap has 4 measuring lines indicated inside, Fill cap to appropriate line for fast, easy, accurate measuring, Close cap tightly after use - no need to rinse.

- Line 1 = 1 teaspoon (tsp)
- Line 2 = 1 Tablespoon (Tbs) = 3 tsp
- Line 3 = 1 fl oz (2 Tbs)
- Line 4 = 2 fl oz (4 Tbs)

APPLICATOR	MIXING INSTRUCTIONS	AREA TO TREAT
Tank Sprayer	Fill to Line 4 two times (4 oz). Add to 1 gal of water.	Spray leaves, stems and trunks until they begin to drip.
ORTHO DIAL 'n SPRAY Hose-End Sprayer	Pour product into sprayer jar. Do not add water. Set dial to 4 oz and spray. Pour leftover concentrate back into package when spraying is complete.	Spray leaves, stems and trunks until they begin to drip.

THREE DIFFERENT WAYS TO CONTROL BRUSH:

- Foliar Spray: Treats large areas of unwanted brush.
- Vine Killing: Spot treats vines growing around desirable trees & shrubs.
- Stump Killing: Treats freshly cut stumps to prevent regrowth.

STUMP & VINE KILLING: To kill stumps of trees such as Alder, Box Elder, Black Cherry, Choke Cherry, Elm, Manzanita, Maple, Oak, Persimmon, Peach, and Willow, apply product undiluted with a paint brush to the entire freshly cut stump, including the cut surface, remaining trunk and exposed roots. **VINE KILLING:** When vines such as Poison Oak, Poison Ivy, etc., grow around desirable plants, cut the vine first and treat as directed for stump killing. Do not reuse paint brush. Wrap brush in newspaper and put in trash collection.

(or)

Apply product undiluted by flipping up the spout on the cap and gently squeezing bottle to cover the entire freshly cut stump. Close spout when finished.
Note: To kill small undesirable woody plants (as listed), cut plant off at ground level and treat freshly cut stump. This prevents regrowth without the unsightliness of the dying plant being present in landscaping. **Keep off desirable plants.**

LAWN WEED CONTROL: (Cool Season Grasses-Bluegrass, Fescue, Ryegrass, Bentgrass)-For control of Dandelion, Oxalis, White Clover, Pennywort, Black Medic, Plantains, Wild Geranium, Florida Pusley, Evening Primrose, Red Sorrel and Ironweed, apply 4 tsp per gal of water to treat 200 sq ft (or 4 fl oz per 6 gal of water to treat 1,200 sq ft). May be applied with an ORTHO SPRAY-ETTE Hose-End Sprayer or tank-type sprayer anytime weeds are actively growing. If lawn needs watering, water thoroughly before application. Make new dilution for each use.
Hardy Weeds-For hard to control weeds or to control any missed in first application, make a second application in 2 to 3 weeks if necessary.
Important: Do not use this product for controlling weeds in flower or vegetable beds or around shrubs or ornamental plantings. Do not use on St. Augustine, Centipede, or Bermudagrass lawns.

IMPORTANT

BRUSH-B-GON Brush Killer is non-selective. Do not apply to or clean equipment around desirable vegetation or ornamental plant as injury may result. Do not apply when drift may occur.
