DIRECTIONS

1. Shake can just before using and occasionally during use.
2. Invert can, hold at arm's length, and point can at weed as you press button. Do not press button when can is in upright position.
3. Stand close to weed (1 to 2 feet) with can aimed at weed and away from face.
4. Push down briefly on button. Spray to cover center of weed, do not over-spray. The spray's roaming action will make it easy for you to see coverage.

NOTE: Be careful when treating weeds not to spray surrounding desirable grasses unless temporary discoloration can be tolerated. Also avoid spraying or spattering of nearby flowers and other desirable plants.
