WHERE TO USE: Apply only where no vegetation is desired, such as driveways, along fences, sidewalks, walkways, patios, curbs, gutters and even cracks in sidewalks. **DO NOT USE IN VEGETABLE GARDENS.**

WHEN TO APPLY: Apply anytime, but for best results, apply to mature weeds and grasses that are actively growing.

Warm sunny weather will accelerate systemic movement from foliage to roots to give complete kill. Visible effects on foliage will occur within one week with complete kill in 2 to 4 weeks. If rainfall occurs within 6 hours, repeat treatment may be required. To avoid drift to desirable plants, apply only when air is calm. If accidental contact of foliage occurs, immediately wash off vegetation with water.

HOW TO APPLY: Remove cap from applicator head and be certain that applicator head is screwed firmly on jug. Invert jug and apply product to thoroughly cover unwanted vegetation. The width of the spray pattern may be adjusted by either raising or lowering the jug. For top killing vegetation around trees, shrubs and buildings and edging around lawns, fences and sidewalks, hold the jug about 2 to 6 inches from the area to be treated depending upon desired width.

For controlling weeds in brick and gravel walks and patios and in other unconfined areas, hold jug at about waist height away from body to avoid contact with skin or clothing. Walk slowly making sure that all undesirable plants are thoroughly covered with spray. One gallon will cover a band 2 inches wide and 1200 feet long. For spot treating or retreating missed areas, hold jug so that spray hits only the weed or area to be treated.
