#### KILLS PESTS INDOORS

To Kill Flies, Mosquitoes, Small Flying Moths, Gnats, Bees and Wasps: Close all doors and windows and direct spray upward into center of room with a slow sweeping motion. Spray 5 to 10 seconds for average room. Keep room closed for 15 minutes after spraying. Ventilate room thoroughly before reentry. Sweep up and destroy fallen insects.

To Kill Cockroaches, Ants, Crickets, and Spiders (including Black Widow Spiders): Contact as many insects as possible. Spray cracks, hidden surfaces under sinks, behind stoves and refrigerators, food storage areas, and wherever these pests hide. To kill ants, spray directly on ants, ant trails, and other areas of entry. Repeat as necessary.

To Kill Confused Flour Beetles, Indian Meal Moth, Sawtoothed Grain Beetles and Rice Weevils: Destroy infested package goods. Remove all other items from pantry. Spray the shelves. Place clean paper on the shelves after the spray has dried. Repeat as necessary.

To Kill Sowbugs, Centipedes, Firebrats and Spiders: Contact as many insects as possible with the spray. Also spray all parts of the room suspected of harboring these pests. Pay special attention to cracks, crevices, hidden surfaces under sinks, behind stoves and refrigerators.

To Kill Fleas and Brown Dog Ticks: Remove old pet bedding. Spray sleeping quarters of pets, around baseboards, window and door frames, wall cracks, and local areas of floors. Do not treat animals with this product. Put fresh bedding in pets' quarters after spray has dried. Treat dogs and cats with FLEA-B-GON® Flea Killer before allowing them to enter treated area.

#### OUTDOORS

To Reduce Annoyance of Houseflies, Gnats, Small Flying Moths and Mosquitoes: Hold container 18 to 24 inches from shrubs, bushes and grassy areas. Spray these areas with a slow sweeping motion while moving away from the treated areas.

Treat open porches and patios in a similar manner. Spray only when the air is still. Allow spray to dissipate before occupying the treated area. Repeat as necessary. To Kill Ornamental Plant Pests Listed Below: Spray directly on insects when possible. Hold can 18 inches from plant. Holding can too close to foliage may result in damage to tender foliage. Spray at first signs of pests, before infestation is heavy. Repeat at 7 to 10 day intervals when insects occur. Spray in the morning or evening when air is still, not in midday or when temperature exceeds 90°F. Do not apply to wilted plants. Caution should be taken when spraying new tender growth on young plants.
