PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS *Copy A*

WARNING: Causes substantial but temporary eye injury. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. **APPLYING:** When handling this product wear goggles or face shield, long pants, long sleeved shirt, shoes, and chemical resistant gloves. Wash nondisposable gloves thoroughly with soap and water before removing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Do not reenter or permit others such as children and pets to reenter treated areas until spray has dried.

STATEMENT OF PRACTICAL TREATMENT: If in eyes: Flush with plenty of water. Call a physician. If swallowed: Drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink 1 to 2 glasses of water. Avoid alcohol. Induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. If medical advice cannot be obtained, then take person and product container to the nearest medical emergency treatment center or hospital. If on skin: Wash with plenty of soap and water. Get medical attention.
Note to Physicians: Emergency Information - call 1-800-457-2022.

ENVIRONMENTAL HAZARDS: This product is toxic to aquatic invertebrates. Drift or runoff may adversely affect aquatic invertebrates and nontarget plants. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

WEED-B-GON READY-SPRAY Lawn Weed Killer is designed for use through the attached sprayer for controlling of broadleaf lawn weeds.

(FOR ORTHO CARTRIDGE SPRAYER ONLY)

The Lock 'N Spray System eliminates mixing, measuring, and messy clean-up. With its unique design and easy one-step application, lawn and garden care is now faster and easier. Simply choose the cartridge application that you need and attach it to the cartridge sprayer (sold separately) as shown below.

DIRECTIONS FOR USE

(ILLUSTRATION)

HOW TO USE: Shake well before use. Attach nozzle to garden hose. Turn the green water control valve on top of spray nozzle at faucet. Extend hose to treated area and work back towards the nozzle over treated areas. Using a control valve product control valve located on the "OPEN" position.

To BEGIN spraying, point sprayer at the green water control valve. The green water control valve automatically mixes with the water. While spraying using an even overlapping treated areas. Refer to the container to guide coverage (except for one-half of the prescribed area). To STOP spraying, turn green water control valve to "CLOSED" position. Turn off water and turn green water control valve sprayer away from any desirable areas from hose.

(For Alternate Spray)

HOW TO APPLY

FOR USE WITH: ORTHO Weed Killer hose-end sprayers or tank-type sprayers. Recommended dilutions and follow directions.

DILUTION

Tank Mixtures of Bicep II with Gramoxone Extra or Roundup for Minimum-Tillage or No-Tillage Systems

In minimum-tillage or no-tillage systems where grain sorghum is planted directly into a cover crop, stale seedbed, established sod, or previous crop residues, the contact herbicides Gramoxone Extra or Roundup may be tank mixed with Bicep II. When used as directed, the Gramoxone Extra portion of the tank mixture controls most emerged annual weeds and suppresses many perennial weeds. Roundup combinations will control emerged annual and perennial weeds when applied as directed on the Roundup label. The Bicep II portion of the tank mixture provides preemergence control of the weeds listed on this label in the Bicep II Applied Alone section.

Refer to the label of each product used in combination and observe the planting details, restrictions, and all other precautions and limitations.

Application: Apply before, during, or after planting but before grain sorghum emerges, at the appropriate rate in Table 6. Add Gramoxone Extra or Roundup at the following broadcast rates:

Gramoxone Extra: 1.5-2.0, 2.0-2.5 or 2.5-3.0 pts. per acre to 1-3 inches, 3-6 inches, or 6-inch tall weeds, respectively. Apply surfactant at 1 or 2 pts. per 100 gals. of spray mixture with 75% or greater or 50-74% nonionic active ingredient, respectively. This treatment will not control weeds taller than 6 inches.

Roundup: 1.5 qts. per acre for control of existing annual weeds, or 2-4 qts. per acre for existing perennial weeds. See the Roundup label for weeds controlled and recommended rates for specific weeds.

Apply in a minimum of 20 gals. of water per acre with conventional spray equipment.
