DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ ENTIRE LABEL BEFORE USING THIS PRODUCT. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

USE PRECAUTIONS

IMPORTANT: If lawn needs watering, water thoroughly 24 hours before application. Do not cut grass 1 to 2 days before and after application. Do not water for 48 hours after application. Watering will wash off weed killing material. Spray when air is calm to avoid spray drift that might injure desirable ornamental plants. Do not apply when temperatures exceed 85° F. Shake well. Apply only the recommended amount for the area to be covered. Exceeding recommended rates may damage turf. Do not reseed, sod or plug lawns or plant stolons for 3 to 4 weeks after use. Do not apply to newly seeded grasses until they have been mowed three times. Spray when weeds are actively growing.

For Cool Season Grasses such as Bluegrass, Fescue, Ryegrasses and Bentgrass, 1 quart covers 3300 sq ft. When applying to Bentgrass, grass height should be 1-1/2" or more.

For Warm Season Grasses such as Bahia, Common Bermuda, Common St. Augustine, Centipede, and Zoysia, 1 quart covers 5000 sq ft. Some temporary injury may occur with these grasses. In Spring, do not apply until grass has reached full green up. In Fall, do not use when grass is going into dormancy. Note: Some hybrid Bermuda grasses may be sensitive to this product. Contact your local Extension Service weed control specialist.

[READY-SPRAY™ APPLICATOR ONLY]

Connect attached spray nozzle to garden hose. Turn water control "ON/OFF" valve on top of sprayer nozzle to "OFF" position. Turn on water at faucet. Extend hose to farthest area to be treated and work backwards towards faucet so that you do not walk over treated areas. Using a coin or key, rotate the small product control valve located near front of nozzle to the "OPEN" position. To BEGIN spraying, point spray nozzle towards lawn and turn water control valve to "ON" position. The sprayer automatically mixes the product into the spray stream. Walk at a steady pace while spraying, using an even sweeping motion, side to side, lightly overlapping treated areas. Refer to measuring scale on side of container to guide coverage. To STOP spraying, turn water control "ON/OFF" valve on spray nozzle to "OFF" position. Rotate small product control valve back to closed position. Turn off water at faucet. To relieve pressure, turn water control "ON/OFF" valve to the "ON" position before removing nozzle from hose, being careful to point nozzle away from you. After relieving hose pressure, turn water control "ON/OFF" valve to the "OFF" position.

4/6

HOW TO APPLY

- No Mix, No Measure.
- Make sure ON/OFF valve is in OFF position
- Shake well before applying.
- Connect spray nozzle to hose.
- Turn on the water at the tap.
- When ready to treat, point in direction away from face and body and pull the tab toward the hose end connection. Turn the ON/OFF valve to the ON position. The water mixes automatically with this product at the proper ratio.
- Walk and spray at a steady pace. Marks on side of bottle/ label indicate the number of square feet covered in 1,000's or approximate area covered.

Weeds will begin to curl within a few days. Some hard-to-control broadleaf weeds may require a second treatment in 3-4 weeks. The maximum number of broadcast applications per treatment site is 2 per year.
