DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
[Stop sign icon] READ ENTIRE LABEL BEFORE USING THIS PRODUCT. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

[Text reorganized from below to enhance consumer understanding]

HOW TO APPLY

- Make sure ON/OFF valve is in OFF position
- Shake well.
- Connect spray nozzle to hose.
- Turn on the water at the tap.
- When ready to treat, point in direction away from face and body and pull the tab toward the hose end connection. Turn the ON/OFF valve to the ON position. The water mixes automatically with this product at the proper ratio.
- Walk and spray at a steady pace. Marks on side of bottle/ label indicate the number of square feet covered in 1,000's or approximate area covered. Apply only the recommended amount for the area to be covered. Exceeding recommended rates may damage turf.

For Cool Season Grasses such as Bluegrass, Fescue, Ryegrasses and Bentgrass, 1 quart covers

239-2640.n2 EPA Accepted 10/31/96
Notification LNS advisory statements; 11/17/97 Notification

3300 sq ft. When applying to Bentgrass, grass height should be 1-1/2" or more.

For Warm Season Grasses such as Bahia, Common Bermuda, Common St. Augustine, Centipede, and Zoysia, 1 quart covers 5000 sq ft. Do not use on Floratam or other improved varieties of St Augustine grass (as damage may occur). Some temporary injury may occur with these [warm season] grasses. In Spring, do not apply until grass has reached full green up. In Fall, do not use when grass is going into dormancy. Note: Some hybrid Bermuda grasses may be sensitive to this product.

Weeds will begin to curl within a few days. Some hard-to-control broadleaf weeds may require a second treatment in 3-4 weeks. The maximum number of broadcast applications per treatment site is 2 per year.

GREENSWEEP WEED & FEED controls Buckhorn, Chickweed, Clover, Dandelion, Ground ivy, Herbit, Knotweed, Lambsquarters, Oxalis, Pigweed, Plantain, Poison Ivy, Ragweed, Spurge, and many other broadleaf weeds.

☎ For additional weeds controlled by this product call 1-800-225-2883

IMPORTANT USE PRECAUTIONS: If lawn needs watering, water thoroughly 24 hours before application. Do not cut grass 1 to 2 days before and after application. Do not water for 48 hours after application as watering will wash off weed killing material. Spray when air is calm to avoid spray drift that might injure desirable ornamental plants. Do not use this product on flower or vegetable beds, or around shrubs, trees or ornamental plantings. Do not spray on Buffalo grass, Dichondra, Lippia, or desirable clovers. Do not apply when temperatures exceed 85° F. Do not reseed, sod or plug lawns or plant stolons for 3 to 4 weeks after use. Do not apply to newly seeded grasses until they have been mowed three times. Spray when weeds are actively growing.

COVERAGE MEASURING GUIDE				
APPROXIMATE AMOUNT USED	COOL SEASON GRASSES	AREA DIMENSIONS	WARM SEASON GRASSES	AREA DIMENSIONS
1/4	825 SQ FT	16 X 50	1250 SQ FT	25 X 50
1/2	1650 SQ FT	33 X 50	2500 SQ FT	50 X 50
3/4	2500 SQ FT	50 X 50	3750 SQ FT	75 X 50
EMPTY	3300 SQ FT	66 X 50	5000 SQ FT	100 X 50

[READY-SPRAY™ APPLICATOR ONLY]

Connect attached spray nozzle to garden hose. Turn water control "ON/OFF" valve on top of sprayer nozzle to "OFF" position. Turn on water at faucet. Extend hose to farthest area to be treated and work backwards towards faucet so that you do not walk over treated areas. Using a coin or key, rotate the small product control valve located near front of nozzle to the "OPEN"

[HOSE-END SPRAYER INSTRUCTIONS] [For refill]

HOW TO APPLY: Use an ORTHO DIAL 'n SPRAY, ORTHO Plant & Weed Sprayette, tank sprayer or hose-end sprayer that is designed for use on lawns.

APPLICATOR	MIXING INSTRUCTIONS	AREA TO TREAT WARM SEASON GRASSES	AREA TO TREAT COOL SEASON GRASSES
ORTHO® DIAL 'n SPRAY®	Measure 3 fl oz into sprayer jar. DO NOT ADD WATER. Set dial to 1 1/2 oz and spray.	500 sq ft (25 x 20)	300 sq ft (15 x 20)
ORTHO® Plant & Weed Spray-ette®	Measure 3 fl oz into sprayer jar. Add water to the 2 gal mark.	500 sq ft (25 x 20)	300 sq ft (15 x 20)
Tank Sprayer	Measure 3 fl oz in 2 gals of water.	500 sq ft (25 x 20)	300 sq ft (15 x 20)

The following are adjustable/dial sprayers:

MANUFACTURER	SETTING
Super K-Gro	20
Melnor #94 & #95	11
Melnor #96 & #97	13
Gilmour #362	4
Gilmour #486	12

Special Note: Some adjustable sprayers do not hold 32 oz. The above settings are based on using 64 oz per 4,250 to 6,666 sq ft on Cool Season grasses or 8,500 to 10,000 sq ft for application on Warm Season grasses. The entire contents of this bottle must be used to make the proper recommended application rate.

[Back Base Panel]

STORAGE AND DISPOSAL

STORAGE: Store product in original container in a safe place. Protect container from freezing. DISPOSAL: Do not reuse container (except for GREENSWEEP refill). Securely wrap partially filled or empty container in newspaper and discard in trash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION: Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin or clothing. Wear long pants, long-sleeved shirt, socks, shoes and chemical resistant gloves when handling or applying this product. After using this product, rinse gloves before removing, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands

[11/17/97 Notification] Optional Directions for Use reformatted to fit on a more compact label

AMOUNT TO SPRAY

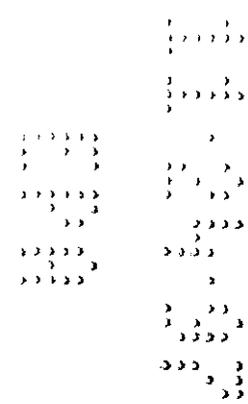

- ◆ Measure lawn. Calculate square feet by multiplying length times width. [walking man icon]
- ◆ Use the amount indicated for your lawn variety:

WARM SEASON LAWNS - Bahia, Common Bermuda, Centipede, Zoysia & St. Augustine
(EXCEPT Floratam, a variety of St. Augustine common in Florida, as damage may occur.):
Each line on cartridge covers approximately 1,000 sq ft.

NOTE: Some temporary injury may occur with these grasses. In Spring, do not apply until
grass has reached full green up. In Fall, do not use when grass is going into dormancy.
Some hybrid Bermuda grasses may be sensitive to this product.

COOL SEASON LAWNS - Bentgrass, Bluegrass, Fescue & Ryegrass: Each line on
cartridge covers approximately 700 sq ft.

NOTE: When applying to Bentgrass, grass height should be 1 1/2" or more.

HOW TO USE THE LOCK 'N SPRAY® [logo] SYSTEM	
CONNECT [Illustration #1]	Connect sprayer to hose.
[Illustration #2]	Attach cartridge to sprayer. Turn cartridge until it clicks into place.
SPRAY [Illustration #3]	To begin spraying, make sure sprayer nozzle tip is down, turn on water and squeeze trigger. Spray evenly over measured area.
FINISH [Reverse illustration #2]	<ul style="list-style-type: none"> To stop spraying, release trigger, unlock cartridge and remove from sprayer. (No need to turn off water.) To clean sprayer, flush with water, squeezing and releasing trigger in 2 short bursts. Turn off water. To disconnect sprayer, relieve water pressure by squeezing trigger.
Cartridge reseals itself automatically - No spills, no leaks!	

FOR BEST RESULTS

- Water 1 to 2 days before application if soil is dry.
- Do not mow 1 to 2 days before and after application.
- Spray when weeds are small and actively growing.
- Spray when air is calm to avoid drift to desirable plants.
- Spray when daytime temperature is below 85°F.
- Rain or watering within 48 hours after treatment may reduce weed control.
- Hard-to-control weeds may require a repeat application in 2 to 3 weeks.
- Treated lawn can be planted with grass seed or sod after 3 to 4 weeks.
- Newly planted lawn can be treated after third mowing.

IMPORTANT

For grass lawns only. Do not spray Buffalograss, Dichondra, Lippia or desirable clovers. Do not use on or around fruits, vegetables, flowers, or other ornamental plants. The maximum number of broadcast applications per treatment site is 2 per year. For spot treating individual weeds use Ready-to-Use Weed-B-Gon® Weed Killer.

How To Use The Lock'n Spray System

- 1. Calculate square feet of lawn by multiplying length times width. [Walking man icon]
2. Connect sprayer to garden hose by turning the sprayer hose connector.
3. Peel off sticker from the top of cartridge.
4. Point sprayer away from you. Hold cartridge so label faces you. Attach cartridge to sprayer.
5. Turn cartridge in either direction until it clicks into place.
6. Rotate Make sure sprayer nozzle tip down.
7. Turn on water.
8. Extend garden hose to farthest section of lawn to be treated. Squeeze (color) trigger and begin spraying.
9. Spray evenly over entire lawn following the listed coverage rates.
10. When finished, release (color) trigger then turn cartridge to unlock and remove from sprayer. (No need to turn off water.)
11. Flush sprayer with water, squeezing and releasing the (color) trigger in short bursts 2 or more times.
12. Turn off water and squeeze the (color) trigger to relieve water pressure.
13. Leave sprayer on garden hose for use as a watering device, or Disconnect sprayer, shake off excess water, and store in a safe place.
14. When finished spraying, cartridge reseals itself automatically. No spills. No leaks.
[aids consumer understanding that additional closure is not needed]

[5 Lines for 16 oz size (or 1/2 liter)] or
[5 Lines for 32 oz size (or 1 liter)]

Where to Use & Coverage Rates

Important: Use Greensweep Weed 'n Feed to kill broadleaf weeds in the cool and warm season lawns listed below without harming them. Do not spray Buffalograss, Dichondra, Lippia or desirable clovers. Do not use on or around fruits, vegetables, flowers, or other ornamental plants.

COOL SEASON LAWNS

Bentgrass, Bluegrass, Fescues, and Ryegrass:

[16 oz size] Each line on cartridge represents the amount of product needed to cover approximately 350 square feet of lawn. or

[32 oz size] Each line on cartridge represents the amount of product needed to cover approximately 700 square feet of lawn.

NOTE: When applying to Bentgrass, grass height should be 1-1/2" or more.

WARM SEASON LAWNS

Bahia, Common Bermuda, Centipede, Zoysia and Common St. Augustine (Do not use on Floratam lawns, a variety of St. Augustine common in Florida, as damage may occur.):

[16 oz size] Each line on cartridge represents the amount of product needed to cover approximately 500 square feet of lawn. or

[32 oz size] Each line on cartridge represents the amount of product needed to cover approximately 1000 square feet of lawn.

Note: Some temporary injury may occur with these grasses. In Spring, do not apply until grass has reached full green up. In Fall, do not use when grass is going into dormancy. Note: Some hybrid Bermuda grasses may be sensitive to this product.

9. Treated lawn can be planted with grass seed or sod after 3 to 4 weeks.
10. Newly planted lawn can be treated after third mowing.
11. For spot treating individual weeds use ready-to-use Weed-B-Gon Weed Killer.

How It Works

Because broadleaf weeds and grasses grow differently, GREENSWEEP Weed 'n Feed kills broadleaf weeds without harming lawn grasses. GREENSWEEP Weed 'n Feed singles out broadleaf **[11/17/97 Notification]** weeds, enters through the leaves and moves inside the weed to the roots. Leaves begin to curl within a week with complete kill in 2 to 4 weeks. The maximum number of broadcast applications per treatment site is 2 per year.

Greensweep Weed & Feed contains 20% nitrogen, the most important nutrient for lawns. Nitrogen gives lawns a deep / dark green color. When used as directed Greensweep Weed & Feed supplements your regular fertilizer program **[11/17/97 Notification]** by giving your lawn a quick feeding boost of nitrogen.
