Subject: Non-PRIA (Pesticide Registration Improvement Act) Partial Labeling Amendment -
Revise label marketing claims.
Product Name: GC SLWK RTU
Admin Number: 239-2782
EPA Receipt Date: 12/13/2023
Action Case Number: 00495144

Dear Mandy Slack:

The amended labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable.

This approval does not affect any terms or conditions that were previously imposed on this registration. You continue to be subject to existing terms or conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one (1) copy of the final printed labeling before you release this product for shipment with the new labeling. In accordance with 40 CFR § 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR § 152.3.

The label submitted with the application has been stamped "Accepted Only Indicated Revisions Reviewed" and is enclosed for your records.

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains statements or claims substantially differing from statements or claims made in connection with obtaining a FIFRA section 3 registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

Your release for shipment of this product constitutes acceptance of these terms. If these terms are not complied with, this registration will be subject to cancellation in accordance with FIFRA section 6.

If you have questions, please contact Jamey Shuler via email at shuler.jamey@epa.gov.

Sincerely,

Kable Bo Davis

PRECAUTIONARY STATEMENTS

ENVIRONMENTAL HAZARDS:

This product is toxic to plants. Drift and run-off may be hazardous to plants in water adjacent to treated areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow pesticide off the treatment area. Rinsing application equipment over the treated area will help to avoid run off to water bodies or drainage systems.

NON-TARGET ORGANISM ADVISORY: This product is toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated site. Protect the forage and habitat of non-target organisms by following label directions intended to minimize spray drift.

GROUNDWATER ADVISORY: This chemical has properties and characteristics associated with chemicals detected in groundwater. This chemical may leach into groundwater if used in areas where soils are permeable, particularly where the water table is shallow

SURFACE WATER ADVISORY: This product may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow ground water. This product is classified as having high potential for reaching surface water via runoff for several months or more after application.

A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features including ponds, streams, and springs will reduce the potential loading of imazapic from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall or irrigation is expected to occur within 48 hours.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Restrictions

- **DO NOT** apply this product in a way that will contact any person, pet, either directly or through drift.
- **DO NOT** spray plants or grasses you like - they will die [too].
- **DO NOT** use in lawns or for lawn renovation as this product prevents desirable grasses from growing too.
- **DO NOT** use for vegetable garden preparation or in and around fruits and vegetables.
- **DO NOT** spray landscaped areas, around young plants or in areas that will be planted or seeded within 64 months.
- **DO NOT** spray next to a fence if desirable plants and grasses are growing on the other side.
- Keep people and pets out of the area during application.

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional text]. Text separated by / denotes and/or options. Highlighted text is new.

- Wait at least 4 months before spraying a previously treated area unless new weeds appear, then re-spray the area as needed, but not exceeding 2 applications per year.
- The maximum single application rate is 128 fl oz per 300 sq ft (0.2 lb imazapic acid equivalent and 25 lb pelargonic acid per acre per application).
- The maximum number of applications is limited to 2 per year (0.4 lb imazapic acid equivalent and 50 lb pelargonic acid per acre per year).
- The maximum yearly application rate is 256 fl oz per 300 sq ft (0.4 lb imazapic acid equivalent and 50 lb pelargonic acid per acre per year).

[HOW IT WORKS/PRODUCT INFORMATION]

- GC SLWK RTU/this/the product kills existing [weeds] [and] [grasses] and prevents/stops [new weeds from growing/regrowth] for up to 64 months.
- GC SLWK RTU/this/the product is intended for use in areas where no vegetation is desired for up to 64 months, including driveways, mulched [landscaped] areas, along fences, sidewalks, walkways, patios, curbs, gutters and even cracks in sidewalks.
- GC SLWK RTU/this/the product is not for use on lawns, on or around fruits, vegetables, flowers, trees, shrubs, or other plants, or over the root zones of desirable vegetation.

WHERE TO APPLY/USE:

- Apply [GC SLWK RTU/this/the product] only in areas where you wish to kill existing weeds [and/or] prevent future weed growth for up to 64 months, including:
 - On cracks and crevices in driveways, sidewalks, walkways and patios
 - Along fences, foundations, retaining walls and curbs
 - In mulched beds or around the base of **well-established** (at least 6 months old) plants, shrubs or trees
 - Gravel areas
 - On parking areas and under decks

Note to PM: any combination of the use sites may be listed on the market label.

HOW TO APPLY/USE:

- Follow [illustrations] [and] [instructions] in the Sprayer Directions section to [prepare/prime] the sprayer.
- Spray existing weeds **AND the entire surrounding weed-prone area** you want to keep weed free for up to 64 months. Spray the area until **thoroughly wet**.
- When treating around the base of **well-established** (at least 6 months old) desirable plants, shield the plants from drift with a sheet of cardboard or plastic. If desirable plants are accidentally sprayed, rinse off immediately with water.

Option 5 – Pump Container with Applicator

[Pump 'n Go/EZ Sprayer/Applicator/Applicator Device/Applicator Name Directions/Instructions]

[HOW TO USE:][HOW TO ASSEMBLE AND USE INSTRUCTIONS][FOR][Pump 'n Go/Applicator Name]

- [CUT]** 1. [Carefully cut the [two] [color] zip tie[s] securing hose and pump handle with scissors, using caution not to cut [color] hose.]

- [CONNECT]** 2. [Unwind hose.][Firmly push the [hose] connector at the end of the hose onto the [color] spout/cap/knob/opening on the pump [, until it locks into place].]

[PREP [WAND/SPRAYER]][Extend Wand] Lift sprayer [wand] off bottle. Push [color] button while pulling out on the sprayer/wand nozzle tip. Fully extend wand/sprayer until [color] button snaps into SPRAY POSITION. NOTE: [Color] Trigger will not function until wand is fully extended and [color] button is visible in the SPRAY POSITION.

[PUMP] Make sure handle is screwed on tightly [, or the bottle will not pressurize]. Pump container 25-30 [X-X] times to pressurize bottle. A full bottle requires fewer pumps than an empty bottle. Pumping to the higher range will provide longer spray duration. After pumping, push pump down and turn handle clockwise/counterclockwise to lock into carrying position.
NOTE: This bottle is designed to expand under pressure and cannot be over-pressurized.

[SPRAY] Aim wand/sprayer. Spray by pushing down [color] trigger with thumb. Adjust spray pattern by rotating [color] nozzle tip up to one-half rotation.

[FINISH][STORE] [When finished spraying,] push the [color] button and retract/fold the wand/sprayer until the [color] button snaps back into the original storage position. Place wand/sprayer back onto the top of the bottle [in the integrated holster with nozzle tip extended through the eyelet opening].

[DEPRESSURIZE] Push pump handle all the way down and turn pump handle and cap counter-clockwise/clockwise to relieve pressure, then retighten to store.

Optional Troubleshooting Section for Options 4 and 8

Troubleshooting Tips:

Problem: Sprayer does not spray [function].

Possible Cause: Batteries not installed properly.

Solution: See instructions for correct battery placement.

Problem: Sprayer makes a straining noise [Sprayer runs but nothing [no product] comes out].

Possible Cause: Sprayer nozzle is turned off.

Solution: Turn sprayer nozzle to [desired] spray setting [position].

Possible Cause: [Red] [color] hose connector is not flipped up.

Solution: Insert [color] hose connector into [color] spout/knob/opening on bottle cap until it clicks and flip up spout until fully upright.

Possible Cause: Sprayer is not primed.

Solution: Press and hold button on sprayer for about X **(10 / 15 / 20 / 30)** seconds to prime sprayer.

Problem: Spray pattern is weak [or uneven] [product flow is uneven or dribbles out of nozzle].

Possible Cause: Weak batteries.

Solution: Install fresh set of batteries.

Possible Cause: [Red] [color] hose connector is not flipped up.

Solution: Insert [color] hose connector into [color] spout/knob/opening on bottle cap until it clicks. [Attach coupler to the cap] and flip up spout until fully upright.

Possible Cause: Sprayer nozzle not fully open.

Solution: Turn sprayer nozzle to [desired] spray setting [position].

 4. Secure pump handle back on container by twisting it clockwise until tight.
-

WHEN TO APPLY/USE:

- Apply to [unwanted] actively growing weeds [and grasses], or to bare soil where plant growth is not desired.
- For best results, apply during warm, sunny weather above 60°F.
- If weeds are taller than 6 inches, they must be cut down and removed before application.
- Apply when the air is calm to avoid drift to desirable plants.
- Rain or watering at least 1 hour after application will NOT wash away effectiveness.
- Wait at least 4 months before spraying a previously treated area unless new weeds appear, then re-spray the area as needed.

WHEN TO REPLANT:

All ornamental bedding plants (annuals and perennials), trees, shrubs, sod and seed can be planted **4 months after** application.
