

BUMPER BAG

CATTLE DUSTER

Net Weight 25 POUNDS

FOR CONTROL OF HORN FLIES ON BEEF AND DAIRY CATTLE

IMPORTANT: Read these entire Directions and Conditions of Sale.

CONDITIONS OF SALE: These Directions for Use reflect the opinion of experts based on tests of effectiveness of toxicity to laboratory animals and of residues in or on food and feed under normal conditions of use. However, because of the wide range of conditions under which this product may be used, even though label directions are followed, it is impossible to eliminate ALL risks associated with its use because of abnormal conditions beyond the control of the seller. The Seller offers, and the Buyer uses, this product subject to the understanding that the Buyer assumes all such risks.

HORN FLY CONTROL

Suspend BUMPER BAG in areas frequented by cattle or in gateways or lanes through which the animals pass daily for water, feed or mineral. Bags may also be suspended in loafing sheds or in front of protected mineral feeders. For lactating dairy cows, BUMPER BAG may be suspended in the stall area in which cows LEAVE their milk pails. In all cases, the bags should be adjusted so that the bottom of the bag will hang four to six inches below the top edge of the animal.

PRECAUTIONS

Do not hang duster over feed, mineral or water troughs. Do not reuse empty container. Destroy it by burying with waste or burning. Stay away from smoke or fumes.

CAUTION: Keep out of reach of Children.

SEE SIDE PANEL FOR ADDITIONAL CAUTIONS

ACTIVE INGREDIENTS:

O, O-Diethyl O-(3-chloro-4-methyl-2-oxo-(2H)-1-benzopyran-7-yl) phosphorothioate 1%

INERT INGREDIENTS 99%
Total 100%

U.S. Patent No. 2,748,146, Canadian Patent No. 523,206

Contains 1.0% CO-RAL

CO-RAL is Reg. TM in U.S. and Canadian Pat. Offs. by Farbenfabriken Bayer A. G. Chemagro Corporation licensee.

CONDITIONS OF SALE

DALY-HERRING COMPANY warrants that this material conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use and Conditions of Sale; subject to the risks referred to herein. DALY-HERRING COMPANY makes no other express or implied warranty, including any other express or implied warranty of FITNESS or of MERCHANTABILITY, and no agent of DALY-HERRING COMPANY is authorized to do so except in writing, with a specific reference to this warranty. Any damages arising from a breach of this warranty shall be limited to direct damages, and shall not include consequential commercial damages such as loss of profits or values, etc.

INSTALLATION OF BUMPER BAG

Suspend the bags by inserting rope, chain or wire through the grommets at the top of the bag and attaching to an overhead structure or by hooking the grommets into hooks fixed to a stationary overhead 2 x 4 at the heights recommended for horn fly control. In areas of frequent or heavy rainfall, BUMPER BAG should be protected from the weather.

Install as many (25-pound) BUMPER BAGS as necessary in lanes or other openings to assure proper dusting of the animals. After the bags are in place, pull the rip cord to allow the insecticide to fall into the bottom of the bag. When dust bags are provided on a free-choice basis, allow one (25-pound) BUMPER BAG per (25 to 50) animals.

USDA REG. NO. 240-161

ACTION

Harmful if inhaled or absorbed through the skin. Do not get in eyes or on skin. Do not breathe dust. Wash thoroughly with soap and warm water after handling.

Do not use in areas where food, feed, or water is available to animals.

If poisoning occurs, obtain prompt medical aid. Prolonged exposure will result in cholinesterase depression.

To Physician - Atropine sulfate is antidotal. 2-FAM is also antidotal and may be administered in conjunction with atropine.
