Avoid prolonged breathing of spray mist or dust

Avoid prolonged or repeated contact with skin

Wash thoroughly after handling

Do not contaminate food or feed products

Highly toxic to fish. Do not contaminate any body of water, by direct application, cleaning of equipment or disposal of wastes and containers.

DIRECTIONS FOR USE

Do not use this product for any uses other than those specified on this label.

Consult your state agricultural experiment station or state agricultural extension service for additional information as the timing, number and rate of applications needed will vary with local conditions.

For the protection of bagged citrus pulp in storage against the cigarette beetle, saw-toothed grain beetle, confused flour beetle, red flour beetle, flat grain beetle, Indian meal moth, Angoumois grain moth, Mediterranean flour moth and the almond moth, use 12 ounces of Malathion Premium Grade 25% Wettable Powder per gallon of water and apply at the rate of 2 gallons per 1,000 square feet when pulp is stored. Make two separate spray applications initially when pulp is stored. Once each month thereafter throughout storage period use 8 ounces per gallon of water and apply at the rate of 2 gallons per 1,000 square feet.

Before citrus pulp is stored, thoroughly clean warehouses by removing and burning all debris and sweepings. Then, apply a residual spray of a recommended insecticide to inside and outside of warehouse. Consult proper authorities concerning type of residual spray to be used. Do not use treated burlap bags other than for dried citrus pulp.

SELLER makes no warranty of any kind, express or implied, concerning the use of this product. BUYER assumes all risk of use or handling, whether in accordance with directions or not.
