WARBEX FAMPUR

DUST CATTLE INSECTICIDE, 1% For The Control of Horn Flies On Cattle

EPA Reg. No. 241-237-AA

Directions for Installing and Charging the WARBEX fampur Dust Bag

CAUTION: Refer to the dust cartridge label for proper precautions for handling WARBEX fampur Dust Cattle Insecticide, 1%.

DUST BAG USES

WARBEX fampur is applied to cattle to control horn flies. Since WARBEX dust bags are intended for self application, the bags must be located in areas frequented by your cattle such as lanes or gateways leading to water, mineral or feeding stations. Suspend a sufficient number of WARBEX dust bags to ensure proper dusting of all animals. At least one bag should be available for each 25 to 50 animals. The bottom of the dust bag should be 4 to 6 inches above the back of the cattle. After installation, charge each bag with one or two cartridges of WARBEX Dust Cattle Insecticide, 1%. Add additional dust as necessary. The accompanying diagrams demonstrate the proper installation and charging procedure.

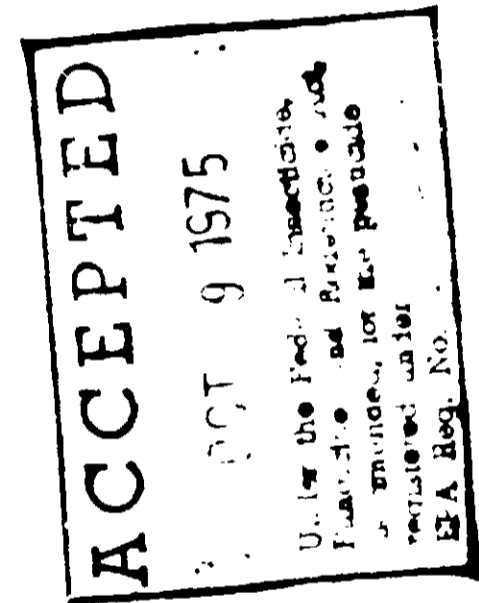

At a gateway leading to a water tank, the bags may be adapted to provide effective dusting of the animals as they enter the tank.

water source, leaving several openings 3 to 4 feet wide. The number of openings will depend on how many cattle are being treated. Hang a WARBEX dust bag in each opening and charge with dust. Each time the cattle go for water, effective horn fly control will be applied. Mineral feeders and salt licks can also be converted into dusting stations in a similar manner.

Here is another suggestion: Install WARBEX dust bags in the gates of your creep feeder. These bags can be placed at the proper height to provide effective horn fly control for your calves.

These are only a few suggestions. There are other areas frequented by your cattle where you can properly use WARBEX dust bags and WARBEX fampur Dust Cattle Insecticide, 1% to provide effective horn fly control. Always use proper insecticide application techniques.

DIRECTIONS FOR USE

WARBEX famphur is applied to cattle to control horn flies. Since WARBEX dust bags are intended for self application, the bags must be located in areas frequented by your cattle such as lanes or gateways leading to water, mineral or feeding stations. Suspend a sufficient number of WARBEX dust bags to ensure proper dusting of all animals. The bottom of the dust bag should be 4 to 6 inches below the backline of the cattle. Complete installation instructions are enclosed with each WARBEX dust bag. At least one bag should be available for each 25 to 50 animals.

After installation, charge each bag with one or two cartridges of WARBEX Dust Cattle Insecticide. Add additional dust as the initial charge becomes depleted.

If dust bags other than WARBEX dust bags are used in exposed situations, the bags should be checked regularly for caking of the dust.

CAUTION: Do not use on lactating dairy cows.
Do not reuse cartridge. Destroy when empty.

This product is toxic to birds. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as directed on this label.

CAUTION!

**HARMFUL IF SWALLOWED
AVOID BREATHING DUST
Wash thoroughly after handling.
Do not contaminate food or feed products.**
