

EPA Reg. No. 241-297

PM 25 241-279  
1/2

**FOR USE IN SOYBEANS**

NOT REVISED  
In accordance with F. Reg. No. 241-297  
based on Draft Labeling dated 5/10/89

**PREPLANT INCORPORATED APPLICATIONS  
WITH DRY BULK FERTILIZERS**

Observe all Precautionary Statements and Limitations on the SQUADRON leaflet label before using.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **DO NOT** apply this product through any type of irrigation system. This label must be in the possession of the user at the time of herbicide application.

SQUADRON may be impregnated on dry bulk fertilizers. When applied as directed, SQUADRON/dry bulk fertilizer mixtures provide weed control equal to that provided by the same rates of SQUADRON applied in water or liquid fertilizer.

Follow all SQUADRON label recommendations regarding incorporation, special instructions and precautions. Apply SQUADRON/dry bulk fertilizer mixtures only with ground equipment.

All individual state regulations relating to dry bulk fertilizer blending, registration, labeling, and application are the responsibility of the individual and/or company selling the SQUADRON/dry bulk fertilizer mixture.

A minimum of 200 pounds and a maximum of 450 pounds of dry bulk fertilizer impregnated with the recommended amount of SQUADRON must be applied per acre.

**DO NOT** impregnate SQUADRON onto coated ammonium nitrate or limestone because these materials will not absorb the herbicide. Dry fertilizer blends containing mixtures of ammonium nitrate or limestone may be impregnated with SQUADRON. A minimum of 200 pounds of impregnated dry bulk fertilizer, excluding the weight of ammonium nitrate or limestone, must be applied per acre.

Apply SQUADRON at the rate of 3 pints per acre. Use the table on page 2 to determine the amount of SQUADRON to be impregnated on a ton of dry bulk fertilizer based on the rate of fertilizer which will be applied per acre.

®Registered Trademark of American Cyanamid Company

SQUADRON RATE PER ACRE	Fertilizer Rate lbs/acre					
	200	250	300	350	400	450
3 PINTS	PINTS PER TON					
	30	24	20	17	15	13 1/3

For those rates not listed in this table, calculate the pints of SQUADRON to be impregnated on a ton of dry bulk fertilizer using the following formula:

$$\frac{\text{2000}}{\text{Pounds of dry fertilizer per acre}} \times \frac{\text{3 Pints of SQUADRON per acre (recommended rate)}}{\text{per ton of fertilizer}} = \text{Pints of SQUADRON}$$

To impregnate SQUADRON on bulk fertilizer, use a closed rotary-drum mixer or other commonly used dry bulk fertilizer blender equipped with suitable spray equipment. Spray nozzles must be placed to provide uniform coverage of SQUADRON onto the fertilizer during mixing.

Apply the SQUADRON/dry bulk fertilizer mixture with an accurately calibrated dry fertilizer spreader. The SQUADRON/dry bulk fertilizer mixture must be spread uniformly on the soil surface. Uneven spreading can cause poor weed control and crop injury.

Refer to Preplant Incorporated Applications section on the SQUADRON leaflet label for incorporation directions.
