

**FOR USE IN WHEAT AND BARLEY  
FOR USE IN IDAHO**

**ASSERT TANK MIX COMBINATION WITH AVENGE® WILD OAT HERBICIDE  
FOR THE CONTROL OF WILD OATS**

**POTATO FOLLOW CROPS**

OBSERVE ALL PRECAUTIONARY STATEMENTS AND LIMITATIONS ON BOTH THE ASSERT AND AVENGE LEAFLET LABELS AND ON BROADLEAF TANK MIX PARTNER LABELS. FOLLOW THE MOST RESTRICTIVE USE PRECAUTIONS, DIRECTIONS, AND RECROPPING/ROTATIONAL LIMITATIONS THAT APPEAR ON ANY PRODUCT LABEL.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. DO NOT apply this product through any type of irrigation system.

Consult the ASSERT leaflet label for tank mix application instructions. Consult the AVENGE leaflet label for wheat varietal restrictions and surfactant requirements.

This label must be in the possession of the user at the time of herbicide application. Review label just prior to follow crop planting.

**FOLLOW CROPS**

This label is for use ONLY in IDAHO.

**BEST AVAILABLE COPY**

DO NOT plant potatoes to be used for seed production for 15 months after the date of any ASSERT application on wheat or barley in any county.

Potatoes for other uses may be planted as a rotational crop 11 months after a tank mix application of 0.75 pt./acre of ASSERT plus 2 pts./acre of AVENGE on wheat and barley in the following counties.

Ada	Cassia	Gem	Owyhee
Bannock	Caribou	Gooding	Payette
Bingham	Cassia	Jerome	Power
Blaine	Elmore	Lincoln	Twin Falls
Boise	Franklin	Minidoka	Washington
Butte		Oneida	

DO NOT plant potatoes for 15 months after any ASSERT application in all other counties.

The 11 month rotation is allowed ONLY if a minimum of 13 inches of net\* irrigation has been applied from the date of an ASSERT plus AVENGE tank mix application to October 15 of the same year. At least 11 inches of irrigation must be applied PRIOR to grain harvest, and at least 2 inches must be applied AFTER grain harvest and before October 15.

\*Use NET irrigation (gross irrigation x equipment efficiency). Consult an irrigation practices handbook from the University of Idaho Cooperative Extension Service for details.

\*Registered Trademark of American Cyanamid Company

(continued on reverse side)

1. Pattern irrigation frequency to maintain consistent soil moisture, because dry soil retards ASSERT degradation.
2. Moldboard plow or deep disk (greater than 6 inches deep) after grain harvest and before October 15, but only in accordance with the Soil Conservation Service recommendations for your area. Apply a minimum of 2 inches net irrigation before moldboard plowing or after deep disking.
3. Bedding in preparation for planting of potatoes should be done in the spring.

The following rotational crops may be planted the season after applying a tank mix application of ASSERT plus AVENGE at recommended rates on wheat and barley in all counties.

Barley  
Soybean

Corn  
Sunflowers

Edible Bean  
Wheat

Safflower

For other follow crops, follow instructions on the ASSERT leaflet label.

If ASSERT is used on a field treated during the same year with Ally<sup>1</sup>, Express<sup>1</sup>, Finesse<sup>1</sup>, Glean<sup>1</sup>, Harmony<sup>1</sup>, or Harmony Extra<sup>2</sup>, follow the most restrictive precautions, directions and recropping/rotation limitations that appear on the respective product labels.

Excessive moisture, drought, and/or cold temperatures may affect the performance of this tank mix as well as the residual effect on rotational crops.

**DO NOT** plant rotational crops in spray overlap areas, as follow crop injury may occur. The end user assumes all risks and consequences resulting from sprayer overlaps from ground and aerial applications.
